

"Europa International" is the name of a station heard for the first time Decemoer 28th on 6340 kHz playing top-40 and oldies. A reporter thought the DJ sounded like one he hears on FMTR; amazingly, the following addr was given out: PO Box SH9, Sheerness, Kent, ME12 1AQ, England. FMTR themselves have lately organized a competition. Listeners are asked to answer the question which was the very first offshore station to be heard in Europe (Laser is wrong !!) and additionally state in less than 15 words "I listen to FMTR because...". Lucky winners will receive a copy of "Now That's Music 4", a compilation album, we understand.

Radio King from Sweden were on the air December 21st on 6275kHz. That transmission was the first since March '86 ! The op Alan Ball will stop to use the Dedemsvaart address for unknown reasons. The station will only do a few broadcasts in 1987 = low activity ! The power of the tx is about 5 - 10 watts.

Radio Kraftwerk (Powerplant) is a mysterious station that appeared on 6282kHz December 21st playing pop music and announcing a Cologne phone number 0221 / 4972632. Those who dialed that number had the marvellous experience of listening to an advert for the new album by Kraftwerk "Electric café", rather than talking to the op !

Maple Leaf Radio from Canada are said to be relayed by Westside soon.

Wavelength 13 report the address of Radio Mongoose (6815kHz) as Flat "A", 129B Milton Road, Gravesend, Kent, England.

An interesting network broadcast could be observed on 7375kHz December 28th when three Scottish stations aired their programmes one after the other. Radios Freedom Int'l, Shetland Int'l as well as WLK were involved there. Further network activity will take place on March 1st this year, tx power is 50 watts. All three stations can be contacted through 314 Argyle Street, Glasgow, Scotland.

North Midlands Radio are planning to make it to shortwave in February '87. Address will be 32 Victoria Road, Salisbury, Wilts., SP1 3NG, UK.

Skull & Bones RS and Radio Vallerie tested on 6211kHz January 4th. Further transmissions on that channel are to go out shortly. Both stations use 10 North Richmond Street, Dublin 1, Eire as their address.

Sonar Sound Radio are planning to be relayed by Radio Pamela soon.

Summer Radio 86, c/o Dedemsvaart, are going to transmit their fourth broadcast on either 5300 or 5310kHz some time in the near future.

Radio Tutenchamun, Wuppertal-address, have suspended their broadcasts over Milano 7295 due to lack of response, and will instead concentrate on txmsns using their own 50-watt-tx. RTUF's New Years Day's programme included the best selling singles of 1986; a complete list of the Media Controle Pop-405 is available for one IRC. A brochure giving details of how their monthly weather predictions are put together can be ordered for another 1kC.

Radio Universum's next broadcast is scheduled to take place January 18th at around 1030 UTC on 5300 kHz. Listen out ! (Wuppertal-maildrop)

Wonderful Free Radio London, c/o Hunstanton, plan to install a new 200-watt-tx to run with a totally new design of aerial some time in 1987. WFRF also hope to start a 41mb broadcast or 42mb late night txmsns. Car stickers as well as T-shirts are to be released later on this year; the production of a station video is taken in consideration, too. A German service will start in March '87, and will be on the air every 3rd month, ie. March, June, September and Decemoer.

And that's about it for this bumper edition. Another one will be out right after the next deadline which will be January 22nd, 1987.

Bye for today, R A D I O T E L E X

PS: Mike Hollis on RTL-208: "I like children. I went to school with them!"

radiotelex

Issue 90 / Vol. 4

January 8th, 1987

c/o Duempler Strasse 6, D-4100 Duisburg 12, West Germany.

Happy New Year !

Welcome back to radiotelex in 1987 with a "once in a lifetime" edition. You've probably never seen such an amount of logs in this mag before, heavy stuff in other words.

The SAE-service, by the way, is still not in operation again but we hope to re-commence that special RT offer in a couple of weeks' time. Watch out for info in RT 91 !

Meanwhile, let's get on the road with the results of some six hours of compiling loggings. Thank you very much to all those who have participated this time, keep up your support.

SPECIAL TAPE OFFER

For sale: High quality recordings of Laser Hot Hits (576kHz) for just £ 2 per hour including postage & packing. Payment by international money order, British postal order or cash in a registered envelope. Enquire c/o RT.

The following 7 recordings are only available (no copies):

- 01) 4/12/86, test, John Anthony, 0849-0949 UTC
- 02) 5/12/86, test, John Lewis, from 11am (60mins)
- 03) 7/12/86, first day of regular broadcasts, David Lee Stone with "Magic Motown", 1007 - 1037 / 1044 - 1114 UTC
- 04) 7/12/86, DL Stone (contd.) and Casey 1115 - 1215 UTC
- 05) 7/12/86, Casey, 1215 - 1315 UTC
- 06) 8/12/86, John Anthony & Andrew Turner, 1645 - 1745 UTC
- 07) 4/12/86, test, John Lewis, from 1012 UTC (90mins 1)

NEWS

The "Anglo Saxon Broadcasting Corporation" is a new project of German origin. According to PIN-Magazine 24, ASBC had the intention to make their maiden broadcast via FMTK on 6319kHz December 21st, to be followed by regular relays every 3rd Sunday of the month. Address: Grummack, D-2340 Kappeln, West Germany (every 10th report will be awarded by a station pennant!).

For the biggest selection of free radio merchandise, incl. "Weekly Report" and medium wave frame aerials...contact "ANORAKS U.K.", P.O. BOX 539, BLACKPOOL, FY1 4RE, ENGLAND.

Radio Apollo Int'l, c/o Hunstanton, popped up once again Decemoer 28th on 6293kHz; a report in says that the show wasn't hosted by Dave Scott but engineer Chris Evans who featured an exclusive interview with Dave Windsor of Riviera 104. RAI are going to transmit again on the 1st Sunday of February '87, their 5th anniversary, by the way.

Britain Radio Int'l, c/o Utrecht & Salisbury, are back, at last! January 25th, 1987 should see the official return to monthly txmsns every 4th & 5th Sunday. The new BRI Newsletter reveals that the reason for the long absence from shortwave is the loss of the complete tx equipment in spring last year. Meanwhile, a new 12-watt-rig is in operation and some changes in the BRI management have taken place though this shall not effect the programmes. Broadcasting times are 1000 - 1345 UTC on a frequency close to 6230 kHz.

British Music Int'l, 3 Rosewarne Cotts-address, are going to have an hour show relayed by an anonymous broadcaster from North Europe soon. For 1987, the station intends to purchase an 8-watt-tx and start QSO-operation under the name R.Dangerous (same addr). In addition, irregular broadcasts by BMXI shall go out once every two months. The shows will contain "ougeois-middle class denizens of world, art, business and other items", we're told.

January 1st, 1987 (New Years Day)

Privatsendern auf über 30 Seiten
Probeheft: DM 3,-/£1/US-\$2/3IRC's

Varied interest. The mysterious broadcaster on 5295 kHz, likely to be a spy station, has been received again January 18th 0922 till c/d 0926 with music by Tony Marshall and Roberto Blanco. Strong stuff! The re-appearance of the Voice of Guernsey was quite a surprise, maybe somebody put out an old tape?! Address is PO Box 1686, Dublin 1, Eire. Another new station from Germany is going to be relayed by Delmare soon, possibly at the end of January even. The station has got the initials 'RSI', no mailing address is known for that one yet. The address of Radio Dead Man which was recently heard as an exchange relay programme with the Satellite BC Company is PO Box 110, Johnson City, NY 13790, USA.

Spectrum Hot Hits have also been heard IDing themselves as "Spectrum Laser Communication". Highly original.

One reporter tells us that he's identified the station using 6217 kHz on January 11th as Radio Witboy (Dutchboy in our listings).

The 4FWS relay on 6230 kHz January 11th was announced to be put out by Radio East Coast Commercial over the air.

Finally, did you notice the large skip zones most of that same day?

Error dept. Take note that the logs of WFRL (6301kHz), R.Bavaria (6295 kHz) as well as BRI (6234kHz) listed under December 25th, 1986 in RT90 should actually belong to Boxing Day.

ANORAKS

P.O. BOX 539
BLACKPOOL FY1 4RE
England

Before it's all over for yet another couple of weeks, may we ask you to send in your QSL Blacklists incl stations that haven't replied to reports after more than half a year. We need to know when you received the station, return postage enclosed, and whether a f/up was sent later on.

Deadline for RT 92 will be February 5th, 1987.

radiotelex

Issue 91 / Vol. 4
January 22nd, 1987

c/o Duempler StraBe 6, D-4100 Duisburg 12, West Germany.

At 2112 UTC on a Thursday evening...

... this edition is at last beginning to take shape. Well, apart from that everything else is back as normal. Thanks to all those of you who have continued to support us in '87, just keep on doing so! Unfortunately, we are unable to print the info on the SAE-service in this issue as proposed in RT 90, we're still waiting for new supplies from the UK. It's probably a matter of keeping one's fingers crossed, who knows. Anyway, over to the hot stuff now.

NEWS

Radio Atlantis SW (Hunstanton & Wuppertal maildrops) were raided by the DTI December 14th, 1986 when transmitting on FM 105 MHz. All equipment was confiscated but fortunately no staff member was caught there. The FM service to SE-England has been re-introduced on December 28th. A new shortwave tx is currently under construction, however, there are still a few problems to be solved. In any case there shall be some SW broadcasts in 1987 including relays of RASW's sister station Radio Marabu from West Germany.

Radio Delmare, Postbus 36, 2050 Antwerp, Belgium, tell us that their transmissions to the Americas every Friday and Saturday 2330 - 0230 UTC on 6225 kHz. The European service on 6206 kHz continues each and every Saturday 0830 - 1700 as well as Sunday 0600 - 1730 UTC which includes relays for a vast of stations (around 20 at the moment).

Radio Discoline Int'l are now scheduled to broadcast via Delmare every 2nd Sunday of the month with an additional repetition later during the month. This follows the excellent response for their Xmas show; about 50 letters were received. February will see another relay over Radio Orion, it is uncertain whether those relays on either 6240/6266/6280 kHz will continue. Please note that all mail to the station should be addressed to: RDI-Intro Disco, c/o Franken, Postfach 1130, D-4154 Tönisvorst 1, West Germany.

Free Medway Town Radio, PO Box SH9, Sheerness, Kent, ME12 1AQ, England, have suspended their weekly broadcasts on 6319kHz due to DTI activities. Instead, there will be a 4-hour-transmission going out once a month. It appears that FMTR's operator Steve Harper is afraid of losing the expensive tx & studio equipment, worth altogether some £ 1,200.

Anoraks UK report that Gary Stevens who ran stations several years ago (e.g. BLMS -ed) is to make a comeback on shortwave very soon under the name of Radio Jeopardy. A frequency of 5910 kHz was mentioned.

Right-Wing-Radio from Finland made their first relay over Delmare a couple of weeks ago. The station informs us that relays over 6206 are to take place every 4th Sunday of the month now, beginning on January 25th. An info-booklet featuring details on RWR's past, present and future plans is available from their new address: c/o PO Box 220342, D-5600 Wuppertal 22, West Germany.

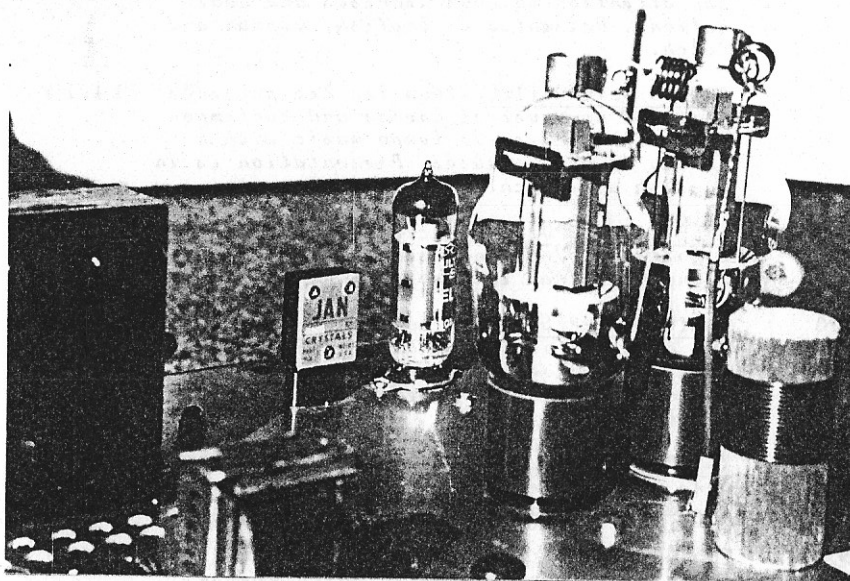

Riverside Radio Int'l, PO Box 39, Waterford, Eire, have given up 6525 kHz and have moved back to 48mts to improve reception. Over the last couple of weeks, 6217kHz was used. RRI planned to relay the Canadian station Maple Leaf Radio whose address is PO Box 1133, Valley View, Alberta, T0H 3N0, Canada. Riverside's recent broadcast via Delmare was part of a free radio spot put out by Radio Marabu.

Radio Universum (c/o Wuppertal) didn't make it to the air last Sunday due to technical problems as a result of the extremely cold winter. However, RU promised to be back on 5300 kHz either next Sunday morning or over a couple of weekends in February. The frequency range near 5.3 MHz seems to be worth checking out these days again!

Radio Waves Int'l, BP 130, 92504 Rueil Cedex, France, won't be very active towards the end of January because the op moving house. RWI plan to publish a booklet called "Free Radio Log 87" including a complete list of active stations on SW, MW and FM. Station managers and DJs are asked to send in info on their respective station to the above address. Publishing date will be some time during the summer this year.

ADVERT. For sale: Many C-90 cassette tapes with recordings of French FM stations (mono/stereo). Each tape costs 35 FF / 6 US-dollars or 10 DM. Contact Michel Morisse, Les Brossards, St.Sulpice d'Annouin, 17250 St.Porchaire, France.

Finally in this bumper one, a couple of photos depicting the 50 watts transmitter currently used by the Pirate Freaks Broadcasting Service (PFBS). Special thanks to Pirate Andy who's kindly supplied these shots :

And there you are again with just the famous last words to follow. Thank you very much to everyone for your help in putting together this issue, no matter which way you contributed, anything is important to us ! Please note that deadline for RT 93 will be February 18th, 1987; a Wednesday for a change. Until then 73s & keep in touch,

R A D I O T E L E X

Issue 92 / Vol. 4
February 5th, 1987

c/o Duempter /Strasse 6, D-4100 Duisburg 12, West Germany.

Hello to you all !

Our first February edition will once again be an extended one, with a look back at Free Radio of last year apart from all the usual stuff here.

At last, we're happy to inform you that from now on the SAE-service is back in operation. This is your chance to swap stamps from the UK, the Netherlands, France and West Germany which enables you, the listener, to mail a so-called stamped-addressed envelope to free radio stations instead of IRCs. All those who don't know how the whole thing works, please find more info on that matter later on.

FRSH

PROGRAMME-SCHEDULE

FRSH

WINTER

ALL TIMES ARE IN G.M.T. !!

SUMMER

08.54	OPENING: Station-ID's & Station-tune.	07.54
09.00	FRS MAGAZINE: the breakfast radio show with Peter Verbruggen. Begin the day with the best in music and the latest news about FRS-Holland, presented in English.	08.00
09.45	FRS GOLDEN SHOW. Joop ter Zee recalls the fabulous sounds of the sixties & seventies with semi non-stop hit oldies.	08.45
10.15	FRS GOES DX. A lively 45 minute programme in which the latest (free) radio news from around the world is reported. Up-to-date offshore and landbased news & comments. Compiled and presented by Peter Verbruggen.	09.15
11.00	GERMAN SHOW. Danny Kay plays Teutonic toe tappers. The best in rock music presented in German. Watch out your radio doesn't get smoking.	10.00
11.45	INTERNATIONAL LISTENERS' LETTER SHOW (I) Gerd & Peter read through your reception reports and letters. Ofcourse they also pay attention to your requests and dedications. Presented in English, German and Dutch.	10.45
12.15	SOUNDS ALTERNATIVE. Joop ter Zee presents a mix of new musical trends and contemporary album music. Up tempo music with a number of new releases. Presentation is in English and Dutch.	11.15
13.00	FREE RADIO SPOT. A special documentary on a portrait of a landbased free radio station. More than interesting!	12.00
13.30	MUSICAL EXPRESS. Bert van Leer plays the hot hits and oldies in his 45 minute radio show. Also short offshore extracts in between the records. Presentation mainly in Dutch.	12.30
14.15	INTERNATIONAL LISTENERS' LETTER SHOW (II). More letters, requests & dedications with Freaky Gerd and Peter 'IRC' Verbruggen.	13.15
14.45	FRS GOES NUTS. Last but not least, this extraordinary programme in which everything is possible. The ideal show for loonies. Production: Long tall Joop ter Zee.	13.45
15.00	CLOSEDOWN!	14.00

NEWS

RADIO CALIFORNIA
INTERNATIONAL
P.O. BOX 22 03 42
D-5600 WUPPERTAL 22
WEST-GERMANY
MUSIC POWER FOR EUROPE

Radio California, c/o KFWF, Postfach 220342, D-5600 Wuppertal 22, FRG, began to use R.Delmare's tx facilities on January 25th. In addition, further relays will take place over Milano 7295. RCI can now also be heard on cable at Ludwigshafen, fully legally on FM 105.4 MHz.

Some troubles have occurred with regards to the mailing address Radio Discoline Int'l is presently using. Therefore, listeners are asked to mail their letters and reports to the following address only : RDI - Funkgemeinschaft, Postfach 1130, D-4154 Tönisvorst 1, FRG. Issue 6 of the RDI Newsletter is out now, 8 pages of news on RDI and other shortwave pirates. The new edition also covers the new private stations in West Germany as well as "borderblaster" R.felstar Int'l (FM 104.2 MHz) from Eastern Belgium.

Europa International, c/o PO Box SH9, Sheerness, Kent, ME12 1AQ, UK, continue to broadcast every week, the new channel 6329 kHz provides good results at the moment. EI use the old FMTR tx (crystal-controlled, six valves with an 807 in the PA stage) which produces about 18 - 20 watts. DJs are Gary Lewis (ex-FMTR, EI's station manager) and Mike Stand.

Here's some up to date general information about Radio Ireland Int'l : RII started transmissions on May 1st, 1983; the present tx output power is 120 watts (6310 kHz) fed into a half wave dipole NE - SW direction. All shows are pre-recorded, and there are a number of relays put out by Ireland (e.g. lately Dublin local station Energy 103 was aired). Transmission times are 1100 - 1330 UTC; all correct reports are most welcome at 10 North Richmond Street, Dublin 1, Eire.

Radio Limit Int'l, c/o Wuppertal-address, are planning to have a special birthday show via Delmare some time in February. The txmsn shall include an hour hosted by Tommy Hope (mailbag) and another one by Tom Clay (Free Radio Show featuring an interview with Jürgen of R. Privat). During March 87 a new DJ will join RLI; broadcasting times may be extended up to two hours then, too. Further relays will go out on 6230 or 6293 kHz soon. By the way, a unique photo-QSL will be issued for the birthday show mentioned above; you can get hold of one of these if you send in a really comprehensive reception report covering at least 30 minutes of that programme. Attention: only 5 photo-QSLs will be available !

Radio Marabu Int'l (Wuppertal-address) are going to air a spot produced by the Pirate Freaks Broadcasting Service (PFBS) as part of their scheduled relay over Delmare on February 8th. The spot will last half an hour.

A case of mutual interference has occurred once again last Sunday when Radio Orion popped up on 6320 kHz with a German language DX-programme by Tom Clay (where do they get those names from ??) and later on with some English shows. However, FMTR turned up on 6319 kHz around 1000 UTC which resulted in quite some QRM for the rest of the morning. Although FMTR recently announced to cease weekly broadcasts, the station hasn't missed a Sunday since then. Perhaps a better check up of clear channels and communication between colleague stations will help next time.

The one and only Satellite Broadcasting Company (c/o Wuppertal - again!) informs us that some 19 broadcasts shall take place during the course of 1987. February 15th will see the first monthly relay over Westside Radio every 3rd Sunday 0700 - 0900 UTC. Moreover, SBC intend to use the Delmare outlet once every three months beginning in March or April. Other relays are planned as well. The station specializes in soul, disco and funk music (like so many nowadays do..).

Radio Sunday Int'l from West Germany made a comeback to shortwave through the facilities of FMTR on February 1st (after more than 3 years of silence). RSI can be contacted by writing to c/o PO Box SH9, Sheerness, Kent, ME12 1AQ, England.

WLR Int'l have tested again in the afternoon hours on 6285 kHz where they were heard with good signals on the continent. Address : 32 Victoria Road, Salisbury, Wiltshire, SP1 3NG, England.

Here's a special hint for all those interested in remarkable DX catches : Radio 101 (Box 2, 4680 Gemmenich, Belgium) are still on the air every Sunday morning. When and where you wonder ? Well, at present only a two minute carrier wave is transmitted due to problems with 101's audio system. Why not listen out for them between 0801 and 0803 UTC on 7361 kHz ?

SAE-SERVICE INFO 1/87

Radiotelex offers this service to everyone who wants to avoid buying those expensive IRCs. Most stations nowadays accept a stamped, self-addressed envelope (SAE) as a method of providing return postage.

We now have in stock again :

- Dutch 75ct stamps (not more than 5 per order)
- British 18p stamps (not more than 5 per order)
- French 2.20 FF stamps (not more than 5 per order)
- West German 0.80 DM stamps (any quantity).

How to order now ? UK DXers please send one 18p stamp for every foreign stamp you require. (The same applies to DXers in Holland, France, Ireland and Sweden who should send stamps of their country respectively). DXers from West Germany please send one 0.80 DM stamp for each foreign stamp you need, pay attention to the limits ! Stamps will be mailed off together with the next issue of Radiotelex, otherwise include extra for return postage. Send your orders to : RT, c/o Duempter Strasse 6, D-4100 Duisburg 12, West Germany.

QSL BLACKLIST

Stations that haven't replied to listeners mail after more than six months :

Rebel R.Revolution, 6290	Jan 86	2IRCs & postcard
Four Freedoms WS, 6290	Jan 86	2IRCs & postcard
Crystal Radio, 7375	Feb 86	2IRCs & postcard, f/up May 86
Sophisticated RS, 5300	Feb 86	2IRCs & postcard (maybe no reply was received because SRS weren't on the air then as far as we know)
KBBR, 7295	Feb 86	2IRCs & postcard
R.Atlantis SW, 6270	Apr 86	2IRCs, f/up July 86
	Apr 86	2IRCs & postcard, f/up Sept 86
Future World Radio, 7315	Apr 86	2IRCs, f/up July 86
R.Barrelhouse, 6206	June 86	IRC & postcard
R.Rastafari, 6206	June 86	IRC & postcard
R.XXII, 6223	June 86	IRC & postcard

In addition, KNHR (USA) and R.Sovereign have been found on other blacklists.

Issue / Vol. 4
February 18th, 1987

c/o Duempter Strasse 6, D-4100 Duisburg 12, West Germany.

Hi there !

Apparently there is little to say after a couple of weeks filled with the normal free radio activity. The SAE-service seems to be going strong again with quite an impressing number of orders received. We would like to remind you once again that you may order not more than five stamps per country each time as otherwise our stock will be exhausted very soon.

S-rate: CON

NEWS

Antenna Centro Citta Tirradio seems to be a new Italian shortwave station testing Saturdays and Sundays on 11570 kHz with 200 watts. No address is known yet.

In their broadcast of February 15th Radio Bavaria announced that no listeners mail will be answered. The reason given is that Bavaria is not a commercial enterprise...?! Well, the station doesn't have an official address at the moment, so why bother.

Britain Radio International inform us that they are presently able to put out a reduced programme schedule which reads as follows: every 4th Sunday of the month, most likely on 6230 kHz; 1000 German service, 1030 Roger Davis (oldies), 1130 Free Radio News followed by mailbag, 1200 Jayne, 1230 Closedown. Both the Norman Nelson show and Free Radio news headlines have been suspended temporarily. By the way, BRI repeated part of their regular January transmission on February 1st due to troubles with RF feedback and a programme tape chewing itself up the previous week. You can contact the station c/o Postbus 19074, 3501 DB Utrecht, NL or 32 Victoria Road, Salisbury, Wiltshire, SP1 3NG, England.

Radio Diamond, c/o KFWF, Postfach 220342, D-5600 Wuppertal 22, FRG, are currently on the air every weekend Saturdays and Sundays on 6284 kHz. The station is going to use a new 20-watt-tx to replace the Lorenz rig of 25/100 watts. Somehow though, Diamond's signal doesn't seem to get too well.

Falcon Radio have been observed once again with a test transmission via the IRRS on 7300 kHz. Interestingly, reports for that broadcast should be sent to 3 Rosewarne Cottages, Rosewarne Downs, near Camborne, Cornwall, TR14 0BE, England.

Despite previous announcements, Free Medway Town Radio are still on every Sunday morning with reduced transmission times of 1000 - 1200 UTC. Station manager told listeners that it was due to their marvellous response that the station will continue with weekly shows on 6319 kHz. According to Anoraks UK, FMTR have received a report from the USA in January, a genuine one as an off/air recording made by that US DXer revealed. FMTR, PO Box SH9, Sheerness, Kent, ME12 1AQ, England.

Radio Marabu Int'l (Wuppertal-address) February broadcast via Delmare is to be repeated on February 22nd. The programmes which included a free radio spot produced by PFBS didn't arrive in time for airing on February 8th.

We have word from Radio Mirage that there will be a delay in replying to mail from November 1986 but everyone will receive an answer eventually. PO Box 2778, Elverhøy, 9001 Tromsø, Norway will get to them.

Radio Orion, c/o 82b Edgewood Road, Rednal, Birmingham, B45 8SG, England, mentioned that they were carrying out late night tests on 6240 kHz. These would commence at around 2300 until 0200 UTC. / AUK

The Satellite Broadcasting Company (c/o Wuppertal) hope to be relayed by Finnish Radio Meteor some time in the near future.

Radio Sovereign have written in with some general info on the station: the current broadcasting schedule is Sundays 0900 - 1400, sometimes on Saturdays as well. RS use a 5/8-watt-tx fed into a halfwave dipole situated 20 feet above the ground. The transmitter is run off mains supply and uses a HC6U crystal; power is to be increased shortly. From now on, Sovereign offers airtime for all stations to be relayed over their tx. A one hour slot costs just £ 5,00 which includes the return postage and packing; the fee for each additional hour is also £ 5,00. If anyone would like to become a discjockey on Sovereign, simply send a cassette tape lasting 45 minutes or one hour to their address, of course there is no charge for that offer. Anyway, keep in mind that RS's format is based upon golden oldies. The address is B.M. Nectar, London, WC1n 3XX, England.

Standard Sound is the tentative name of a station put out by Radio Pamela on February 15th. An address in Portsmouth (England) was announced. Any further info?

Super Clan Radio, Postbus 30025, Arnhem, NL made a surprising return to the airwaves on 6259 kHz February 15th with a test transmission. Plans to launch a new station under the name of "Radio 7" or "Magic Seven Music" have been given up for the time being. The rather long break in activity of Super Clan has been due to the operator's involvement in other radio projects including offshore radio.

Reports claim that Radio Torenvalk, Postbus 36, 7010 AA Gaanderen, NL have blown up their rig towards the end of last year when trying to use their medium wave tx for shortwave (the valves didn't like that, we're told). Nevertheless, a new transmitter is under construction, Torenvalk will no doubt be back soon.

Westside Radio intended to transmit on 11463 kHz last Sunday; further broadcasts in that frequency range are expected to take place soon. Reports are most welcome at 310 Collins Avenue West, Whitehall, Dublin 9, Eire.

NEWSDESK

Antenna Centro Citta
Tirradio (r/f RT 93)
can be contacted at
ACCT, Servizio Tecnico, CP 1531, 50100 Firenze 7, Italy.

Radio Apollo Int'l, c/o PO Box 5, Hunstanton, Norfolk, PE36 5AU, England, announced in their broadcast March 1st that they're going to transmit every 1st Sunday of the month from now on. DJs at RA1 are at the moment Mike Davis and Duncan James, along with station manager Dave Scott.

Radio C 1 is the name of a new free radio project from Germany which is supposed to start over Delmare 6206 fairly soon. "C 1" is not connected with "Radio C" from Italy which has been observed on 9810 kHz during the course of last year. No address is known for that new station yet. Radio C 1 - "Cologne Power for Europe".

Radio East Coast Commercial (Hunstanton-address) carried out a test broadcast on 11583 kHz February 15th from 1310 till 1440 UTC. Future tests may go out on 11580 kHz in order to avoid QRM with Kol Israel on 11585 kHz. RECC now offer a brandnew SW station address list which is available for 2 IRCs or an A4 size SAE from the official mailing address, envelopes should be marked "attention Neal West".

As a consequence of the FMTR raid, Europa International are suspending their broadcasts on 6329 kHz for at least 3 or 4 weeks. EI uses the FMTR mailing address.

Radio Marabu Int'l (c/o Wuppertal & Utrecht) tell us that their next regular 2nd Sunday broadcast via Delmare on March 8th shall include the first programme produced by DJs of the Barcelona FM-pirate Radio P.I.C.A. which is to focus on "industrial music" (sledgehammers etc.). Listeners' response is welcome at E.d.S., Apartado 19106, 08080 Barcelona in Spain. The programme is called "Escuela de Sirenas".

Unconfirmed reports say that in their broadcast on February 15th, Radio Nova, Postbus 5, 2638 Reet (Reet petite ? -ed), Belgium, announced that they would close down the following week. Nova was logged both February 22nd and March 1st, so what is fact and what is fiction ?!

The more or less mysterious station we reported in RT 93 as "Standard Sound" is in fact Sona Sound from Portsmouth (see also RT 86 !).

Right-Wing-Radio (Wuppertal-address) are schedules to transmit every 4th Sunday of the month via Delmare on 6206 kHz between 1300 and 1500 UTC. This spring, there will also be relays over the Irish Riverside Radio Int'l (the first show has been posted last month). The station has received many complaints about the very strong echo-cho-ho-o used in their programmes, we have word from DJ Tex Willer that the echo will not be fully quitted as that is part of their style but there will also be some "normal" announcements included now.

Scandinavian Free Radio plan to be back over Easter this year. In their test broadcast February 8th on 6230 kHz a QSY to 11425 kHz was mentioned, perhaps worth checking next time. Address is 32 Victoria Road...

Radio Sovereign are going to change name into Platinum Radio.

Radio Titanic Int'l (Dedemsvaart) tested to the USA last Sunday on 6225 kHz with 100 watts. The station informs us that some 20 reports dating back to November 86 will soon get a reply, be patient ! RTI's next txmsn is to take place in August 87 when the 12th anniversary will be celebrated, by then a new QSL-card will be released.

Westside Radio tested again on 11463 kHz March 1st 0710 - 0830 UTC.

WFRL (Hunstanton) wasn't on the air in February due to technical problems but will be back on the 2nd Sunday of March, probably on 6301 kHz.

Deadline for RT 95 will be March 19th, 1987. Bye for now !

Gary Stevens, we're told, plans to launch his new station Radio Jeopardy in about two weeks' time on either 6240 or 6270 kHz. Exams shall take place between 1130 and 1330 UTC, programmes will consist of "Harrow" comedy along with some sort of swap shop/pen pal spot. In general there will be more spoken word than on BBMS. Anyway, lots of 60's material (music etc.) will be aired. Once the station is established, a test on 5910 KHz will be put out either Saturday or Sunday. Help with a DX-programme or similar would be much appreciated.

Radio Milano Int'l hasn't been heard for quite some time on shortwave. The reason for this is unknown at the moment, even RMI's well-known QSL-manager Dario Monferini is uncertain about the future of the 7295-service. This may either be a temporary suspension of SW broadcasts due to those poor conditions (and interference problems) or the final word by the management as shortwave has never been profitable. RMI is still on the air with the local broadcasting schedule.

The new address of Premier Radio Int'l is 1 Riversdale Drive, Dublin 22, Republic of Ireland, according to R.East Coast Commercial.

Radio Rainbow International returned to their regular Sunday morning schedule on 6240 kHz March 15th after a period of reorganizing the station. From now on, Rainbow is broadcasting on FM 97.8 MHz and AM 1521 kHz in parallel to 6240. Power on shortwave, by the way, has been increased to 500 watts. Recently, the station has received their very first report from the USA from Greg Bares of Connecticut who logged one of Rainbow's regular Sunday broadcasts on 6240 kHz. Address: 151 Moneymore, Drogheda, Co. Louth, Eire.

Radio Scorpio (Utrecht-address) asked us to remind you of the station's 2nd anniversary show due to take place April 5th 0900 - 1300 UTC on 6206 kHz. A special competition as well as several surprises will be included then.

Sona Sound (c/f RF 93/94) uses the following address: c/o 10 Bromyard Crescent, Paulsgrove, Portsmouth, PO6 3SP, England. The programme logged February 15th on 6224 kHz (via Pamela) was presented by Pete Woods.

Summer Radio 86 (Dedemsvaart-address) informs us that the station is about to change back to 48mts since the broadcasts on the 57mb (5300 - 5310 kHz) have been unsuccessful, only one report was received for a couple of transmissions in January and February this year.

Super Clan Radio, c/o Postbus 30025, 6803 AA Arnhem, NL, lately carried out tests during the week on 6204 kHz. Regular broadcasts are soon to be re-introduced according to the following schedule: Mon - Fri: relay of Delta Radio 90 (Nijmegen FM station), Sat: Super Clan's own programming featuring shows recorded on board the MV Ross Revenge by the Caroline DJs, station manager Herbert Visser, Johnny Best and others. Broadcasting times are 0800 - 1300 UTC (summertime: 0700 - 1200 UTC); new QSL-cards in full colour are now available!

An interesting station has appeared on 6931/3 kHz which seems to call itself "Studio Ex". Mostly nonstop Italian pop music has been noted; besides, the station's technical standards are rather low, the tx is slightly drifting and heavily overmodulated, too. A tentative address in 50014 Fierenze, Italy has been given out.

UNID. A truly mysterious station was logged on 6313/5 kHz March 1st, seemingly of East German origin. The station closed down with the GDR national anthem, the (meaningless) word "Huitsilapochtli" was spelled several times over the air... probably an early April -fool joke?!

Radio 101 intends to be back with full programming on 41mts in April.

And there we go yet again. Remember RT96's deadline will be April 2nd, 1987, that issue should hopefully be out in time again. Don't forget to adjust yourselves and your chronometers to summertime (CEST) next weekend. Please note that all times mentioned in this mag are always UTC! 73s & FFFR from RADIOTELEX

radiotelex

Issue 95 / Vol. 4

March 22nd, 1987

c/o Duempler Strasse 6, D-4100 Duisburg 12, West Germany.

Hello everybody!

We're starting off this time with apologies for being rather late with this issue of Radiotelex, hopefully the only one to be edited on a Sunday afternoon. Actually, it doesn't happen that often that last Friday was yours truly's last day in school, so it would seem to be hard to go to print on such a special day... Away from the not too senseful chat to credits we forgot to give last time due to lack of space; our belated thanks therefore to Radio East Coast Commercial, Anoraks UK as well as the Discoline. Newsletters from which a few items in RT 94 were taken from. Propagation conditions still appear to be anything but settled, just like the weather outside things are changing day by day. Probably as a result of those uncertain conditions the level of free radio activity remains rather low at the moment.

ADVERT

For sale: shortwave crystal CR-7/U for 6239.06 kHz. Works perfectly in every SW rig. Ideal for QSOs on 6240 ... If interested, send £ 5.00 or DM 20,- to the Pirate Freaks Broadcasting Service (PFBS), c/o Postbus 41, 7700 AA Dedemsvaart, Netherlands.

For the biggest selection of free radio merchandise, incl. "Weekly Report" and medium wave frame aeriels...contact "ANORAKS U.K.", P.O. BOX 539, BLACKPOOL, FY1 4RE, ENGLAND.

NEWS

ABC Radio is the name for a new British shortwave station which plans to broadcast on the 1st and 3rd Sundays of every month and will use the Wuppertal mailing address. / Wavelength 14

Canzoni Radio (PO Box 725, Arnhem, NL and c/o 3 Rosewarne Cottages, Rosearne Downs, near Camborne, Cornwall, TR14 OBE, England) planned to transmit March 22nd on 6320 kHz for an hour. No signal was logged at our location, probably due to long skip conditions. For the future, Canzoni intend to co-operate with another German FM-pirate, listen out for details. A special QSL-card has been released on the occasion of their X-mas 1986 broadcast (reprinted below), reports sent for that transmission will very soon get a verification. New stickers have also been promised.

Special-QSL-Verivication

CANZONI RADIO CHRISTMAS 1986

We verify that _____
has received our
X-mas-transmission on
December 25, 1986 at
_____. We've broadcast
on 6282 khz with 28 watts
of Music-Power.

Radio Delmare, Postbus 36, 2050 Antwerp, Belgium, weren't able to put out their scheduled programmes on March 14th due to troubles with the modulator. That day only a blank carrier was broadcast on 6206 kHz for two hours. It was also announced that Radio USA will be aired over Delmare soon, the address for that stateside station is PO Box 5074, Hilo, Hawaii 96720, USA. R.USA has previously been relayed in Europe over R.Apollo int'l. Interestingly, Delmare say that they haven't heard from their well-known Saturday airtime customer Free Radio Company for some time.

Anoraks UK report that a proposed new Dublin shortwave station plans to commence in the spring on 5910 kHz. Anyone wishing to purchase airtime (e.g. by providing good quality, one hour pre-recorded shows on cassette) should immediately contact R.N., c/o R.Ireland, 10 North Richmond Street, Dublin 2, Eire, requesting further details.

Radio Hexagon made a surprising return to the airwaves March 15th via Delmare 6206. A one hour rock programme hosted by Richard Grahame (R.Pacific, R.Pamela) was heard. The current mailing address is c/o Postfach 1225, D-4354 Datteln, West Germany.

Error dept. c/f RT 93. Falcon Radio. "7300" should actually read "7330".

Studio X, Via San Bartolo 13, Pian di Bartolo, 50014 Fiesole, Italy, are testing 24 hours a day on 11455 and 6925-8 (v) with 200 watts in parallel with FM 105.6 MHz.

Radio 101 intend to return to shortwave with regular programmes very soon, probably on April 10th. Listen out for additional weekday transmission between April 10th and 17th. It is also possible that 101 will resume their long distance CB service on 27035 kHz. The station's schedule includes Sunday broadcasts 0800 - 1000 UTC on 41 metres. You can contact 101 at Postbus 2, 4680 Gemmenich, Belgium.

QUOTATION OF THE FORNIGHT

"Domestos killed 99% of all DTI men." (part of a new commercial heard on Radio Orion March 22nd, 1987)

Recently, we received a couple of promotional sheets from "Pirate Publications" (PO Box 19, Herne Bay, Kent, CT6 7XA, England) with a number of interesting offers such as colour photos of the Communicator, Stereo Hits jingle tape, Hits 576 rate card plus also the new book by Paul A. Rusling "A Laser Hit Can Burn" which is to come out in April this year. For details, contact them directly at the above address.

Well, there's not a lot going on these days it seems. Let's hope we have more stuff for you next time, remember RT 97's deadline will be April 23rd, 1987. Thanks a lot in advance for all your contributions, they're all of importance for this mag. Bye for now!

Issue 96 / Vol. 4

April 2nd, 1987

c/o Duempler /Strasse 6, D-4100 Duisburg 12, West Germany.

For the 96th time,

welcome once again to this edition of Radiotelex, out bang on time for a change. As you can see, it is our actual intention to keep our schedules, for the time being.

Talking of which, please note that the next issue of RT will be out after the Easter weekend thus will be incorporating all the logs of that festive season in a bumper list. For that reason, deadline for RT 97 will be April 23rd, 1987 (Thursday again). By the way, it would help us compiling those lists if you could send your contributions as early as possible.

THE NEWS

Antenna Centro, c/o Stefano Manelli, CP 1532, 50100 Firenze 7, Italy, are testing 24 hours per day on 11505 kHz with 200 watts in parallel with FM 88.8 MHz.

Radio Apollo International are scheduled to broadcast next Sunday, April 5th, on 6285 kHz, according to Anoraks UK. c/o Hunstanton-address.

Radio Caldonia / Aquarius plan to run a marathon transmission over Easter on 7370, 6205 (what about Delmare ?? -ed), plus FM 97.6 MHz. The transmitter(s) the two stations use are operated by Aquarius, both the studio and mailing address are run by Caldonia. Postbus 65027, 3002 DA Rotterdam, NL will get to them. / Discoline Newsletter 8

Radio East Coast Commercial are presently trying to obtain new X-tals for 26 metre band use (in the 11575 - 11580 kHz range). RECC also tested on 6290 kHz March 22nd with a new aerial, results on the continent were particularly pleasing due to long skip conditions that day. Address: c/o PO Box 5, Hunstanton, Norfolk, PE36 5AU, England (station logo pictured elsewhere in this mag).

Radio Neptune it'll, Postbus 185, 8180 AD Heerde, Netherlands, were heard March 22nd announcing that that would be their final broadcast for the time being due to "problems".

We have been hinted at the fact that Radio Orion (82b Edgewood Road, Rednal, Birmingham, B45 8SG, England) are currently using both 6266 and 6267 kHz for their weekend transmissions. It has been suggested that this is because of two different sites (and txs) used by the station. Anyway, Orion are still going strong in spite of their recent raid by the DTI with regular broadcasts every Saturday and Sunday plus additional appearances from time to time throughout the week.

Rainbow Radio Germany (address see beneath) plan to return with a series of relays lined up for the near future over Tonair, Riverside, Skywave, Waves and Westside. Furthermore, a number of programmes are to be put out by various Dutch medium wave stations on 1094, 1508 or 1610-1640 kHz. Soon there will be the station's 2nd anniversary celebrations coming up, by then their own 50-watt-tx should be operational again. Please don't mix RRG up with

RAINBOW RADIO
POSTBUS 725
NL - ARNHEM

Radio Rainbow International who carry on broadcasting every Sunday on 6240 kHz, and AM 1521 kHz plus locally to the area of Drogheda on FM 96.5 MHz. The station now offers to relay UK and European based free radio stations for 5 per hour. Listen out for half an hour of Taiwanese music as well as 30 mins of Sunrise Radio shortly.

The Satellite Broadcasting Company wrote in with this remarkable news item: SBC will be back for two hours Easter Sunday via Westside Radio on 6280 kHz starting at 0700 UTC. The DJ line-up includes Jean-Luc, Rick Randmom (of Radio Meteor) and Mikel Air. There shall also be a one-hour-show relayed by a "powerful continental station" (guess yourself) around Easter which includes 38(1) minutes with guest host Johnny Best. Address is Postfach 220342, D-5600 Wuppertal 22, FRG.

Starfleet Radio (Utrecht-address) tested March 14/15th with an own rig for over three hours on 6400 and 6548 kHz. The tx features an EL84 as the oscillator and an 807 valve in the PA stage, output power is about 25 watts. A halfwave dipole aerial 7-8 mts above the ground is used, too. Further tests were planned for March 29th to take place on 6400 and 6553 kHz. New crystals will be ordered shortly in order to find a better spot on the dial. In April, there shall be tests on 5242.88 and 5224 kHz. At the moment, shows are presented by Jonathan Dee and Norman Walker. New QSL-cards have been printed and are available for double return postage plus a detailed report covering at least 20 minutes listening time.

UNID. The station logged March 8th, 1987 on 6220 kHz (c/f RT 95) has been identified as Radio Delta from Ruurlo / NL.

I ♥ 101
RADIO MILANO INTERNATIONAL FM 101

department officials, one of whom was the very same head, with whom they had the unofficial contact. They arrived with large cutting equipment and although they produced a warrant to confiscate all the equipment, had to be asked first before they would show it. It was "flushed" in front of station co-owner, Heady Eddie, who was unable to take it all in, and when asked for a copy, the official said they would send one to them at a later date.

At the time of the raid, the station boss was at the Northern service premises on the border and when he asked over the telephone if the officials would wait the 35 minutes or so it would take to drive back to the Drogheda studios, they refused. The boss then telephoned the local newspaper, and within two minutes, they had a reporter and photographer at the scene. Photographs were then taken and one of the Garda took the camera from the NUJ reporter and removed the film. The officials then continued to remove all the equipment in both the main on-air and production studios, as well as the FM transmitter and compressor. They were quite ruthless about this removal and cut all wires, except the mains, with cutters, rather than removing plugs. Following this, the station were asked to switch off all other transmitters and told never to return, otherwise they would be raided again. The officials knew the exact locations of all the other transmitters. When the station boss finally arrived, they travelled to the local Garda station and spent two hours, complaining about the film incident and not being able to examine the warrant. The P & T officials had rushed at high speed, back to Dublin, with all the confiscated equipment.

At 17.30, the owners decided to put the station back on the air, from a secret location, and by 19.30, all the transmitters were back on the air, as normal.

On Thursday, "watch-dogs" were posted at each transmitter site, and later in the day, two officials were spotted in a field, 100 yards from one of the transmitters. When told they were trespassing, they showed passes and said that they were checking for radio interference. They then left the site and by 17.00 had tracked the station to its new studio location. As a result, at 20.30, the studios were vacated and a loop tape was left on over-night. By Friday morning (17th), normal programmes had resumed from yet another new location and these continued until mid-afternoon, when, as a security precaution, they moved yet again. Programming seems to have been more or less continuous, following the return after the raid, until now (April 19th -ed).

The officials seemed only to be interested in the FM transmitters being switched off. No mention was ever made of medium wave. The film incident with a local NUJ reporter and photographer, is being taken to the high court.

Further developments are awaited, after the Easter holiday, although, on the Radio West programme, The Anorak Show, Heady Eddie said that the station would keep bouncing back, even if they had to operate from a tape machine and a car battery in the middle of a field."

QUOTATION OF THE FORTNIGHT

"Station announcements of shortwave broadcasters come only at the lowest point of signals affected by deep fading."
(One of our Swedish subscribers about the essence of Sunday morning pirate listening).

Well, so far for this bumper issue of Radiotelex. Keep in mind that deadline for RT 98 will be May 7th, 1987. We look forward to hearing from you !

Oh, by the way, do you need some extra postage ...

radiotelex

Issue 97 / Vol. 4
April 23rd, 1987

c/o Duempler / StraBe 6, D-4100 Duisburg 12, West Germany.

Hello radio lovers,

if you've spent your Easter Sunday morning hunting eggs in the yard, we're afraid to tell you that you've missed quite a lot of Free Radio activity on that day. Well, as a matter of fact we are once again able to offer a loglist which should actually cover almost all stations on the air then. Thanks a lot to all our regular contributors, remember that without your kind help this mag would have never been possible.

Good news for those few of you who've been using the SAE-service of Radiotelex as for the first time after a very long time we now have a limited stock of Irish 28p stamps available. Apart from that we still offer British 18p, Dutch 75dt, French 2.20 FF and German 0.80DM stamps to everybody who doesn't waste his money buying IRCs. For details how to order please see RT 92 where everything had been fully explained. Please keep in mind though that you mustn't order more than five stamps per country !

Radio Waves Int'

c/o BP 130, F-92504
Rueil Cedex, France,
have changed back to
48 metres for the time
being in order to gain a larger audience as their 41mb txmsns didn't
go out too well. At the moment, 6275 kHz is in use but also other
frequencies, e.g. 6225 kHz, shall be tried out soon. In addition, RWI
intend to relay South Coast Radio Int'l, a UK FM-station (don't mix
that one up with the famous MW station from Ireland). Operator Peter
Hills told us that a couple of picture postcards can also be accepted
as return postage since IRCs have grown awfully expensive.

"4IFR" is the name of a new free radio project from New Zealand which
is about to hit the airwaves in Europe via Westside Radio some time in
the not too distant future. The station will be on either once a month
or every two months. Watch out !

Radio 101 is finally back with actual programming after quite some time
of "blank carrier only" broadcasts due to technical difficulties.
It appears that 101 will continue to use 7361.5 kHz which by now seems
to be a rather poor choice but as mentioned earlier in this edition
there aren't too many alternatives. Anyway, new shows by Johnny Best,
Danny Kay and station manager Chris will now go out. While 101's chief
engineer was on the station's Irish tx site some special programmes
were aired including old tapes of Radio Jessica, Flash 1610 and also
a relay of local FM station "Radio Horizon" (Banna Beach Hotel, Tralee,
Co. Kerry, Eire) which was heard April 19th.

The final news item this time deals with the recent incidents at the
Irish AM/FM station Boyneside Radio which as you all probably know
is directly connected to shortwave station Radio Rainbow International.
Instead of giving you just a brief summary we decided to reprint the
report on this subject in full as it is to be found in the very latest
issue of Anoraks UK's "Weekly Report" :
"The shock news this week, comes from this country (Ireland -ed) and
Drogheda, in particular. Boyneside Radio, with headquarters and studios
in the town, for almost ten years, were subject of a raid...
The incident began on Monday afternoon, last, 13th April, at 17.30 BST,
when an official of the Post and Telecommunications, accompanied by
three Gardai (police), entered the station's premises, at Donaghys
Mill. The staff were told to close down all transmitters, cease
broadcasting at once, and never come back on the air again. The official
said that interference was being caused, but when asked to elaborate,
refused to comment further. At this point, the station boss, told the
official that he refused to close down and put 25 people out of work,
and instead, would check the transmitters and if a fault was found,
would remove the offending unit. With this, the official seemed
satisfied, and left.
The only transmitter which was thought might have caused the alleged
interference, was the studio link, on 99.1 MHz, as this was the only
transmitter situated in a built up area. As a precaution, this was
taken out of service and replaced by a known "clean" transmitter, which
had been checked with a scanner, along with all the other transmitters.
In the meantime, unofficial contact had been made, between a Boyneside
Radio representative and the head official of the Dept. P & T. It
was arranged that the official would check on Wednesday morning (15th),
if the alleged interference was still being caused and the station would
ring him at 14.30, the same day, to ascertain the result. At 14.07,
when the station was just about to make that call to the Department,
the "cavalry" arrived in the form of six Gardai, one detective and two

NEWS

Radio Dublin, Dublin 8, Republic of Ireland, returned to 6910 kHz on April 4th after several weeks of absence from shortwave. The station can now be heard almost daily with their usual good signal across Europe again.

Steve Harper, operator of Free Medway Town Radio which was raided by the British DTI of late has to appear at Sheerness Magistrates court on May 1st at 1030 local time. Feel free to support Steve "on site" or by sending your comments to PO Box SH9, Sheerness, Kent, ME12 1AQ, England.

Currently the most mysterious station these days is Radio Huitsilapochtli which has appeared twice lately on 6295 and 6314 kHz. The station had been observed for the first time March 1st this year by what time the common opinion was that that must have been a one-off hoax. In fact, this doesn't seem to be the case after all as Huitsilapochtli now announce the address c/o Postfach 220342, D-5600 Wuppertal 22, FRG over the air. The maildrop has confirmed that the station has officially hired their PO Box. RH still closes down with the GDR national anthem although it would be very unlikely if the tx was operated from East Germany. Several DXers thought that Huitsilapochtli is a special project initiated by R.Tutenchamun, in the meantime RTUT's operators have strongly denied any connection with RH! We're curious about what's to happen next - any suggestions?

Interference. ently, two more official broadcasters have started using the frequency range above the 41 metre band, ie. 7300 - 7400 kHz. WGSN from Boston (USA) is now using 7365 kHz until around 1000 UTC, even German programmes are aired there. In addition, RTT Tunisia have settled down on 7310 kHz throughout the day with Arabis progrs in parallel with 11550 kHz. Let's hope that 41mts won't be lost for free radio broadcasting in the future as there is no real alternative for long distance reception.

According to Anoraks UK, Radio Ireland Int'l have closed down for good on March 22nd, 1987 due to personal reasons. Ireland used to be on the air weekly for a remarkable period of time on 6310 kHz with a number of programmes well worth listening to. (On the other hand, we don't have to figure out now if Ireland was actually using 6310 or 6312 kHz on previous Sundays! -ed)

To our surprise, Radio Jeopardy were heard QSOing with Westside Radio as well as Radio Rainbow Int'l on 6240 kHz April 5th, 1987. We don't have any info with regards to the actual start of programming but at least the station does have proper tx facilities which had always been a major problem with Jeopardy's predecessor BBMS back in 1982/83. No address is known for that new station as yet.

Radio Madison, c/o PO Box 41, 7700 AA Dedemsvaart, Holland, have written in with the info that the station intends to be on the air just once a year. In fact, Madison have so far managed to keep their schedule as they were last logged on August 10th, 1986 when a few 41mb frequencies were used. Listeners should try for their next broadcast in July or August '87. Meanwhile, new stickers (excellent quality!) have been printed and are now available from the above mailing address.

The Canadian station Maple Leaf Radio is planning more relays in Europe in the future, they have had a good response from listeners following their first relays over Riverside and Westside Radio. MLR are also exchanging tapes with Canzoni Radio from West Germany. It seems there are only one or two other free radio stations in Canada but these other stations tend to play only top-40 music. Recently, TNFM in British Columbia was shot down after U.S. (!) authorities filed a complaint. As a result Maple Leaf Radio are the only pirate in Western Canada. By the way, they use a 15 watt-tx. Address: PO Box 1133, Valley View, Alberta, T0H 3N0, Canada.

Radio Marabu Int'l (c/o Wuppertal) should have been relayed by Delaware April 12th with a one-hour show by their French DJ Simon but wasn't for an unknown reason.

We have word from Radio Milano International that the station has only been off the air for a couple of weeks in February and just one week in March. Well, anyhow it seems that RMI's signal is not being received this end, so we still wonder what could be the reason for this strange situation. Or has RMI changed its frequency ?? We'd rather appreciate information about what's going on rather than complaints about incorrect info in this mag.

Radio Orion, 82b Edgewood Road, Rednal, Birmingham, B45 8SG, England, have changed frequency to 6290 kHz where they're presently putting out both weekday and Sunday transmissions. This new channel has certainly brought less utility interference but it also means more QRM with free radio colleagues who use nearby channels (e.g. Dutchboy, PFBS, Kristel etc.). Lately, Orion have come up with some very humorous programming, e.g. the presentation of a (fictional) new IBA station with an "all talk, no music" format.

Next on our list is Radio Pogo 104 (c/o Wuppertal-address) who have received well over 200 reports since their first broadcast about half a year ago and would like to ask all those waiting for a reply to be patient. There might be some delays in replying to letters thanks to lack of time. Of course, everybody will get an answer eventually. Listen out for a recording of the first day of broadcast by German private FM station "Radio Hamburg" which will be featured in the Pogo 104 - Aircheck in May. The station is on the air every 1st Sunday of each month via Delmare 6206. New stickers (see beneath) have also been released by now. You see, spring time is sticker time

Free Radio on Shortwave

Riverside Radio Int'l should be using 50 watts of power soon, this will hopefully improve their reception on the longer distances.

The Satellite Broadcasting Company plan to have further relays over Europa Int'l (6330 kHz) as well as Radio Pamela (6224 + 6611.5 kHz).

Radio Skywave Int'l, c/o IRRS, PO Box 1686, Dublin 1, Eire, have now settled down on 6850 kHz, this frequency is seemingly running in parallel with a low power outlet on 6260 kHz (Skywave's old channel). The latter signal appears to be so low that we don't even get any logs for that ! Apart from their own programming, Skywave also relay a number of other stations including Radio Sounds Int'l recently heard there.

Another chapter in our neverending story about Sona Sound (c/f RT 95) whose programme heard via Pamela February 15th, 1987 turned out to be an unauthorized relay off their FM service to Kent.

The programme of Sunrise Radio aired April 12th over R.Rainbow Int was in fact a tape of X-mas 1981. We're still not completely sure if that is the Scandinavian soul station which used to be active mainly on 26mts in recent years, or a different one, so we won't print any address at this time.

Another surprising comeback was made by Radio Vallerie April 5th on 6326 kHz. Their last known address is 144 Grange Abbey Drive, Dublin 13 in the Republic of Ireland.

Future World Radio have sold their tx and are now involved in a joint FM station called "Magic 103.8" with KBC-Radio. KBC are going to cease their shortwave broadcasts, too.

Netherlands. Several Dutch medium wave pirates have plans to transmit on 48 metres in the future; Radio Onbekend, Postbus 24, 7260 AA Ruurlo, Holland, were received May 3rd on 6224 kHz. The station had previously broadcast on 48mts in 1986 and claims to have received mail from Iceland for that txmsn. Radio Newspaperman Int'l, Postbus 178, 7240 AD Lochem, NL, appear to have tested with 200 watts on 6240 kHz April 12th. Besides, a station called "Zoefde Haas" (the Dutch counterpart to Radio Marabu, we're told) as well as Radio Woodpecker have announced their plans for broadcasts on short wave.

The operators of Radio Nova Belgium, Postbus 5, B-2638 Reet, Belgium, wrote in with the following info: Nova is still on the air every week on approx. 6296 kHz, the info we printed in RT 94 was incorrect for which we'd like to apologize. DJs at the station are Kon van der Mar and Filip van de Berg who play a funk, soul, disco format. A DX-corner including free radio news shall be introduced shortly. Power used at present is about 10 watts fed into a halfwave dipole, this is to be increased to 100 watts later on.

The PIN Drop Box Postfach 220342, D-5600 Wuppertal 22, FRG, informs us that the following stations are presently using their address service: Radio Diamond, Radio Joystick, Radio Limit Int'l, Radio Marabu Int'l, R.Atlantis SW (E), Satellite BC Company, R.Tutenchamun, R.Universum, Radio California Int'l, R.Channel 292, R.Sunshine (L), Holiday Radio, R.Sounds Int'l (E), R.Pogo 104, R.Brazilia, Right-Wing-Radio (E), ABC-Radio (E), R.Huitzilopochtli, R.Wave (L), R.Quasar, Radio WXYZ, Quark Broadcasting Company, R.Palm Beach, Radio-Tele Niedersachsen (L). (E) = only write to these stations in the English language as they don't understand any German; (L) = local FM projects from West Germany.

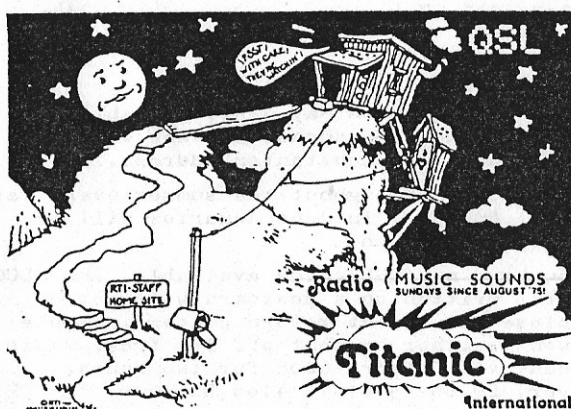

Rainbow Radio Germany can now be contacted through Postbus 38, 6744 ZG Edeveen, Netherlands. The old address Postbus 725, Arnhem, NL is still in operation but is now mainly used by Singapore Airlines which means a delay in forwarding listeners' mail and an increased risk of losing letters. RRG was relayed over the 1kW tx of R.Telstar from Ruurlo April 26th; listen out for further relays soon!

Starfleet Radio (Utrecht-address) has had some technical problems lately, resulting in a reduction of power but the station should be back with their full 30 watts for their next broadcast due to take place on May 24th at 0725 UTC on 7385 kHz (alt. freqs: 6225, 6295 plus 6317 kHz). Tests on 5242.88 kHz had to be suspended for now but will go out at a later date definitely.

Radio Titanic Int'l has issued a brandnew QSL-card which will be mailed off from their 12th anniversary txmsns around August onwards. RTI's old QSLs are almost completely out of stock, about 1000 cards have been sent off to listeners since 1975!

Radio Unicorn were heard with their first broadcast April 26 via Pamela. It was mentioned that they were going to be on the air every 1st Sunday of the month via relays. Address: c/o 3 Rosewarne Cottis etc.

Till next time 73s from RT!

Issue 98 / Vol. 4

May 7th, 1987

c/o Duempter /Waarre 6, D-4100 Duisburg 12, West Germany.

Hello !

Just one of those regular four page issues this time in spite of a remarkable amount of logs and news received. Thanks as ever to everyone who has helped us by sending in any type of info, this is highly appreciated. Before we actually start, we'd like to remind you that at this very moment we still have 10 Irish 28p stamps in stock, so we can only accept two more orders. Hurry up !

NEWS

Radio Apollo Int'l will be on the air again on May 31st, probably on 6285 kHz, this is instead of RAI's regular broadcast in June which won't take place due to holidays. Apollo uses the Hunstanton address.

Radio Aquarius Int'l intend to transmit throughout the summer every 1st Sunday of the month 0900-1000 UTC. However, in June Aquarius will be back on the 2nd Sunday as a one-off exception.

We have word that Radio CLCG now have new QSL-cards available. The CLCG management informs us that reports written on a postcard will not be verified, listeners have to enclose sufficient return postage. Sample copies of the "CLCG Magazine" won't either be sent off for free. Radio CLCG can be heard every 4th Sunday via Delmare 6206 for two hours. Address: CLCG, c/o Wilfried Meyer, PO Box 340101, 4100 Duisburg 11, FRG.

According to Anoraks UK, Radio Duck now broadcast the golden oldies format every Sunday on either 6260 or 6270 kHz with 10 watts power. Duck seems to be the successor of Radio Sovereign which had previously broadcast similar programming over a lowpowered tx on 6270/6295 kHz. Presenters are 0800 Tim Stewart, 0900 Stewart Price and 1000 - 1100 UTC Tim Allen. Address is R.D., c/o 83B Church Street, Stoke Newington, London N16, England.

Radio Ireland Int'l is currently relaying North Dublin Community Radio's morning call programme every Sunday on 6310 kHz. Furthermore, another commercial FM station from North Dublin is to be aired as well. The two Tony's are doing shows for both stations which is the main reason why RII has officially closed down. Nevertheless, if there is sufficient reaction the staff will seriously consider bringing the station back as it was before. Listeners are asked to drop a line to RII's mailing address of 10 North Richmond Street, Dublin 1, Eire. By the way, the addr of NDCR is Walden House, Oscar Taylor Road, Coolock, Dublin 17.

Alan Davis who formerly recorded German shows for Radio Orion back in 1986 has recently joined the Voice of Peace ! Home in the UK, Orion tell us that they might be using 6320 kHz on Sundays soon. Saturday broadcasts shall go out on 6290 Khz, alternative frequencies are 6233 and 6266.67 kHz (Orion has been observed on 6267.4 kHz though). Write to : 82b Edgewood Road, Rednal, Birmingham, B45 8SG, England.

Radio Sovereign which apparently has no connection to the one mentioned above was first heard last Sunday via R.Rainbow Int'l on 1521 & 6240 kHz with a test tape. The station plans to broadcast over Rainbow's tx facilities on FM, AM and shortwave daily 0600 - 1800 UTC with a solid gold oldies format. Last Sunday though Rainbow interrupted Sovereign's programming to put out the Kieren Murray, Free Radio Show 1100 - 1200. During the tests the following address was read out for reports : c/o New Radio Communications, PO Box 45, Kettering, Northants. NN16 0NW, England. It seems as if a well-known radio personality is behind this...

A new Scandinavian project by the name of Wildwood Radio is about to test with just nonstop music in the beginning of June on either 6300 or 6350 kHz. No address is known for that one as yet.

The following passage is quoted from an info-sheet issued by WLR : "WLR is a joint venture combining the former radio stations 'Woodstock' and 'Lynda' - both Scottish based groups in the UK. We broadcast mainly live programmes, with a tendency towards 'Free Radio DX' information with 'New' and 'Golden Oldie' music. On the second Sunday of each month between 1000 and 1200 UTC, a 2-hour-relay is broadcast on 6273 kHz via the 'Scottish Free Radio Network' 30-watt-tx, sited on the East coast of Ireland. The first hour is hosted by Luis Nieto, the final hour with John Dean. Any other programmes aired by WLR are usually live transmissions from central Scotland sites, on 6285 kHz on Sunday mornings but no strict-schedule is followed. We are shortly to test on 41mb, possibly 7375 kHz with a 100 watt tx, mainly for the benefit of distant European DXers." At the moment the station uses a crystal-controlled eight valve transmitter with 50 watts of power. You can contact WLR through 32 Victoria Road, Salisbury, Wiltshire, SP1 3NG, England or 314 Argyle Street, Glasgow, Scotland.

Publications. Once again, this time a computer print rather called "Current Pirate List". CPL contains all addresses of present free radio operations and is updated continuously. For a copy, send 2.40 DM or 1 US-dollar or 2 IRCs (mint stamps accepted) to Apelvågen 13, 33017 Rydaholm, Sweden. Recommended by RT for good content and layout.

And that's all for this edition of Radiotelex which turned out to be a Radio-Tipp-Ex rather this time. Three items had to be cancelled due to the incident concerning Delmare. Special thanks, by the way, to Peter Verbrüggen who supplied that info, and of course, to everyone else who has contributed to this issue. 73s & FFFR from RADIOTELEX

RADIO DELMARE RAIDED - FRS-HOLLAND APPEAL TO STATIONS

The Antwerp based Radio Delmare was raided last Sunday, May 17th, during the relay of FRS-Holland transmissions on 6206 kHz at approx. 1030 UTC. The transmitter finally left the airwaves at around 1045 UTC. The station operator Johan Rood was raided by two RTT (Belgien postal authorities) men as well as two members of the police, the so-called Rijkswacht. Those men were quite friendly and only (!) took the tx; no audio equipment such as tapes and records were confiscated. The antenna though has been put under seal. The by now second raid at Delmare is of course an enormous set-back for Delmare itself, FRS-Holland but also all the other stations that used to hire airtime over the powerful tx. FRS-Holland have told us that they want to continue with their regular broadcasts as soon as possible ("We can't sit down and wait."). Therefore, FRSH is looking for new relay facilities every 3rd Sunday of the month for at least four hours over any station that is able to provide reasonably good reception in Western Europe. FRS-Holland will of course pay for those relays. Enquiries on this subject should be addressed to: FRSH, "Relay Service", c/o Postbus 41, 7700 AA Dedemsvaart, Netherlands. At this point we would also like to mention that Johan of Delmare urgently needs money as with an upcoming court case he is to be fined heavily or even has to face imprisonment. It might be considered a normal thing that in particular all those stations that have profited by Delmare's good signal all over Europe should now support Johan as well as they can. Remember that this has been his second raid and last time he had to pay approximately 5500,- DM. Finally, it appears that the raid has been initiated by both the British and Belgian authorities. In April this year the RAD Control in London sent a telex to the Belgian RTT complaining about Delmare's transmissions on 6206 kHz. However, no specific reason is known for that complaint.

NEWS

Radio Caldonia Int'l are starting off this news section with the info that they are going to change to 31 metres for a few months and later on to the 25mb. At the moment the station is busy finding another tx for the 49mb in order to broadcast on two frequencies in the future. Additionally, txmsns will go out simultaneously on both FM 96.1 MHz and shortwave 7370 kHz. Caldonia plans to play just nonstop music without any announcements on the 2nd & 4th Sunday of the month to test the equipment. Their current schedule reads as follows: every 3rd Sunday 0630 - 1010 UTC on around 7370 kHz. The present programme line-up is: 0630 nonstop music / 0700 Coffee Break with Robert v/d Hoek / 0800 Tommy van Leeuwen / 0830 Bart de Vries / 0900 Ron de Wolf / 0930 Rob v/d Meer (in the Dutch language) / 1000 - 1010 Closedown with Robert v/d Hoek. Soon to join the station are Richard v/d Berg and famous evangelist Johan Maasbach ("spelling M-A-S..."). Address: Postbus 65027, 3002 DA Rotterdam, Netherlands.

Radio Delta, Postbus 65, 7260 AB Ruurlo, NL told us that the station has tested on shortwave 6318 kHz using their own rig. However, operator Peter Bell says that he prefers broadcasting on medium wave with his ex-army BC610E tx which produces about 750 watts output power.

Interference. Have you noticed Bisim Radio (The Voice of the Turkish Communist Party) now use 7335 kHz throughout the morning? The progrs are probably put out from East German soil which explains the very strong signal received here.

Indian Ocean Broadcasting System is the name of the first free radio project from India whose maiden broadcast will be aired over Radio Tutenchamun during the summer. IOBS is currently constructing a 40 watt shortwave tx for txmsns to the Indian subcontinent. When the tx is ready for use, RIUT will be relayed down there. If the whole project turns out to be successful, a regular relay exchange shall be established. By the way, the English language shows of IOBS are to include pop music from India and Japan. No address is known for that new station yet.

Radio Joystick (Wuppertal maildrop) is going to have four shows lasting 30 minutes each relayed over Radio 101's shortwave outlet on 7361 kHz beginning in autumn this year. A new info-leaflet has been issued towards the station's 2nd anniversary.

Radio Marabu Int'l, c/o Wuppertal, are soon to be relayed by Radio Tutenchamun for 45 minutes on 48 metres.

Marconi Radio Int'l have ceased transmissions by March 22nd, 1987.

A number of sources report that the Voice of America (that's not a pirate! -ed) have hired airtime on the medium wave transmitter of Radio Milano Int'l serving Northern Italy on 1301 kHz.

June 14th will see the 2nd birthday transmission of Rainbow R.Germany to take place over their own tx on 6320 kHz (alt.frequency is 6555) 1000 - 1200 UTC. Please note that RRG's new address is c/o Postbus 178, Lochem, Netherlands. Both the Arnhem and Edeveen maildrops are not in use anymore!

Riverside Radio Int'l, PO Box 39, Waterford, Eire, are still using their old 5-watt-tx as Andy Ellis of ABC who were to build them a new, more powerful one has been too busy to do so. Frequencies in use recently have been either 6217 or 6230 kHz, and relays of BRI have been made during the past three months now, too. Two new programmes from Maple Leaf Radio have been received which will go out shortly, and they themselves in Canada will start to transmit at the end of the month which will include relays of Riverside across there. Back in Europe, RRI will be relaying another Canadian station called CGWN (Canada's Great White North); in addition, listen out for three more C&W music shows hosted by Chuck Wilson of KLB from Eire as well as a couple of half hour programmes hosted by Roger Davis of BRI.

We have word from Radio Skywave Int'l (c/o IRRS, PO Box 1686, Dublin 1, Eire) who say that the station has ceased their shortwave programmes in order to build up a community radio station serving the North Inner City of Dublin on FM 88.07 MHz under the name of Downtown Radio. Relays of Falcon Radio, R.Sounds Int etc. shall however continue on Sunday mornings. At the present time, 6851 kHz is used for this service.

Starfleet Radio (Utrecht-address) have announced to transmit on June 8th once again. A frequency of 6287 kHz might be used that day.

Summer Radio 86 (c/o Dedemsvaart) are now looking for their first female listener who should send in a brief description, a photo as well as sufficient return postage in order to win a few singles of her own choice which will be raffled off among all entries. (So far for the first marriage advertisement in this magazine -ed).

Radio Titanic Int'l (Dedemsvaart maildrop) are said to be celebrating their 12th anniversary with a 90-minute-transmission via R.Apollo Int'l.

Wavelength 15 report that Falcon Radio operator Peter Moss is the man behind the new station Radio Unicorn (c/o 3 Rosewarne Cott's...) which has announced to put out an "all news" format every 3rd Sunday of the month. Verification letters should be available by now.

As always to finish off, a big thank you to all our contributors; keep on sending your news and logs, deadline for the next issue of RT (the mighty 101) will be June 18th, 1987. Bye for now!

radiotelex

Issue 100 / Vol. 4

c/o Duempler /strasse 6, D-4100 Duisburg 12, West Germany.

Hello there!

Following last fortnight's disastrous info on the raid at Radio Delmare we have no sensational news to report on this time. Nevertheless watch out for items that deal with worldwide radio piracy with stations from Canada and India supposed to appear in Europe rather soon. Before we start at last, we'd like to remind you that our SAE-service continues to be in operation, your chance to get hold of mint stamps from the UK, Holland, France and West Germany to be used as return postage. Please note that we do no longer stock Irish 28p stamps and will not do so for the foreseeable future!

Radio Waves International, c/o B.P. 130, 92504 Rueil edex, France, are still broadcasting every Sunday on 6275 kHz. According to their latest info-sheets, new stickers are now available free of charge. Meanwhile, R.W.I. are looking for German and Dutch DJs to produce regular programmes in their own language respectively. In addition, the station sells the original studio tapes with old shows of Waves, 90 minutes of R.W.I. in stereo cost just £ 3.00 or the equivalent in any Western currency.

Radio WXYZ (Wuppertal maildrop) have plans for hopefully obtaining their own tx in August which if successful will be known as Y-100. In the meantime the station's staff are requesting someone to do them an English programme, for which in return they will then do them a German show.

Due to troubles with their audio system, Radio 101, P.O.Box 2, 4680 Gemmenich, Belgium, are currently only putting out a two-hour blank carrier on 7361/2 kHz instead of their full programming. As a matter of fact, a few weeks ago 101 put out a half hour programme by Danny Kay four times during one Sunday morning from their remote site somewhere in Ireland !

An item missed out before tells that KIWI Radio, P.O.Box 1437, Hastings, New Zealand, has been quiet over the past six months as a result of a burglary. The station, however, did some tests recently on 41mts shortwave and FM and hope to be fully operational again by mid June, so the R.W.I. Info-sheet 4/87 says.

QSL - SURVEY

station	freq	days	sent	received
R.Pamela	6224	61	2IRCS	QSL-card, pers.letter

Rainbow R.Germany	6275	19	RP	QSL-card, sticker
R.Apollo Int	6285	33	RP	QSL-card, info-sheet, pers.letter

And that concludes another episode in the life of Free Radio as it happens on shortwave every weekend. Try not to be too angry about the lack of news this time but we intend to give you information rather than speculation, and you'd surely not be satisfied with items such as "station so-and-so appreciates mail from listeners" (isn't that amazing)

Anyway, deadline for issue 102 will be July 2nd, 1987. We look forward to your contributions which as said before are most helpful for compiling this magazine. Please spread the word of our new address and meanwhile, have fun in the sun (which one ?) !

73s & FFR from RADIOTELEX

radiotelex

Issue 101 / Vol. 4
June 21st, 1987

c/o Duempler /strasse 6, D-4100 Duisburg 12, West Germany.

Attention readers !

Don't dare and ignore another stupid editorial this time as we have to tell you some very important news regarding the future of this magazine. From June 20th onwards, Radiotelex will be using a new mailing address :

R.T.
c/o P.O.Box 103771 -
D-2800 Bremen 1
West Germany

From now on, that address will be the only one you should use for any correspondence with regards to RT ! We would be pleased if as many free radio magazines or DX-programmes were kind enough to reprint our new address for the benefit of everyone involved in this publication. Thanks a lot !

In spite of the change in address, the mag will continue on its regular, fortnightly basis. The SAE-service will also carry on as usual, of course.

By the way, in case you wonder why this issue is a little bit late, this is due to a couple of public holidays during the previous week where most of our mail was held up in the post. It would have been senseless to go to print on Friday with a number of contributions still expected to arrive the same day. Needless to say, with mostly poor conditions and little activity anyway, every little bit we get is of importance to us.

NEWS

Radio Apollo International, P.O.Box 5, Hunstanton, Norfolk, PE36 5AU, England, plan to broadcast on August 16th in addition to their 1st Sunday schedule. RAI's transmission on August 9th will include 90 mins of Radio Titanic International's 12th birthday shows. RAI can be contacted through Postbus 41, 7700 AA Dedemsvaart, Netherlands.

A surprising return was made on June 7th by Britain's Better Music Station although on that occasion not over their own rig but via Westside Radio from Dublin. BBMS announced both the following mailing addresses: 185 Fleet Street, London EC4, England / c/o Westside Radio, 310 Collins Avenue West, Whitehall, Dublin 9, Eire.

Radio Hexagon Int'l (c/o Postfach 1225, D-4354 Datteln, West Germany or 10 Bromyard Crescent, Paulsgrove, Portsmouth, PO6 3SP, England) will hopefully be relayed shortly (see loglist of June 14th) -ed) via the Dutch Relay Service on either the 2nd or 4th of the month at 1000 on either 6284, 7383, 11400 or 14850 kHz depending on propagation conditions, of course.

Yet another f/up on the recent Delmare raid deals with Radio Limit Int'l (c/o Postfach 220342, D-5600 Wuppertal 22, West Germany) which will start monthly relays over Radio Orion lasting two hours each, probably on the 2nd Sunday of the month although this hasn't yet been confirmed. RLI have been heard for the first time through the "Offener Kanal" (open channel) of the Ludwigshafen cable radio network on June 14th, 1987 between 1700 and 1800 CEST on 105.4 MHz in stereo. Limit also offers studio recordings for 8,-DM / 5 US-dollars / 8 IRCs / £ 3.00; a C-90 cassette (tape supplied by RLI).

Scandinavian Free Radio were logged once again June 7th on 7323.4 kHz with (as it was announced) the station's final appearance this summer. SFR presently uses 32 Victoria Road, Salisbury, Wiltshire, SP1 3NG, England.

Southcoast Radio, c/o RWI, B.P. 130, 92504 Rueil-Malmaison Cedex, France are said to operate every Sunday from Le Havre (!) on 7340 kHz between 0500 and 0800 UTC. Any logs ?

be continued despite less response from the listeners. Apart from that, the plans for a transmitter of their own will be realized very soon.

According to Anoraks UK Radio Sovereign is due to officially start full programming on 1521, 6240 kHz and 96.1 MHz on Sunday, 12th July. You can reach this station at Now Radio Communications, P.O.Box 45, Kettering, Northants, NN16 0NW, England.

From July onwards, Radio Stella will be regularly on the air on 7384 kHz and/or 6318 kHz. Radio Stella has a new address which is 23 South Beechwood, Edinburgh, EH12 5YR, Scotland.

Paul Johns of Radio Unicorn informs us that the station broadcasts every 3rd weekend of the month via Radio Pamela, preferably on Saturday mornings as there is less interference compared to Sundays. Unicorn is an all news format station and is pleased to hear from colleague stations or any Free Radio organisations that provide some information to be aired over the station. Reports will be verified by QSL-letter if sent to the following address: c/o 3 Rosewarne Cottages, Rosewarne Downs, near Camborne, Cornwall, TR14 0BE, England.

Here is a little extract from the latest info-sheet of W.L.R.: W.L.R. is a joint venture combining the former radio stations R. Woodstock and R. Lynda both Scottish based groups in the UK. They broadcast mainly live-programs with a tendency towards "Free Radio DX" information with New 'and Golden Oldie' music. On the 02nd Sunday of each month between 1000-1200 UTC a two hour relay is broadcast on 6240 kHz (new frequency!) via the "Scottish Free Radio Network" with a 30 Watts transmitter, sited on the East Coast of Ireland. The first hour is hosted by Luis Nieto, the final hour with John Dean. Any other programmes aired by W.L.R. are usually live transmissions from Central Scotland sites, on 6285 kHz on Sunday mornings, but no strict schedule is followed. They are shortly to test on 41 metres 7383 (this seems to be a very demanded frequency in future) or 7370 kHz from 1000-1200 BST with a 100 Watts transmitter.

W.L.R. has a new mailing-address, too: 23 South Beechwood, Edinburgh, EH12 5YR, Scotland. By the way, the studio wall of W.L.R. consists of about 250 postcards.

Radio 101 will return to the airwaves with regular programs on Wednesday, 15th July 1987. Between 15th and 29th July, they will also make weekday transmissions (with relays like Horizon FM etc.) as far as transmitting relay programmes at the weekends. Radio 101 also plan to resume their CB service in the 11 m.b. At present, only a blank carrier was transmitted on 7361 kHz on Sundays between 0800 and 1000 UTC, as the station's audio system strikes again.

Well, and that's the end of the first issue of RADIOTELEX published by the new editorial staff. We would like to thank all the contributors of this edition for their great support and hope you will continue to support us in future.

Deadline for RT 103 will be on 16th July 1987. Until then,

Issue 102 / Vol. 4
02nd July 1987

c/o P.O. Box 10 37 71. D-2300 Bremen I. West Germany.

Hi everybody,

After 1 1/2 year the RADIOTELEX-headquarters is back in Bremen. But to avoid any misunderstandings and to answer some of your questions, we have to point out that the new editorial staff of RADIOTELEX is not the same as the former Bremen-staff. We should also express our thanks to the former staff in Duisburg for having done their work regarding this mag very well and we hope we can continue this high standard in future. As already stated in the last issue of RT, we will continue this mag on its fortnightly basis. And the same rule shall apply to the SAE-service, which will also carry on. Unfortunately, some letters from Scandinavia and Great Britain didn't arrive in time, so that we can publish their logs and news only in the next issue of RT. It seems the postal authorities work very slowly at the moment (let's hope the technical departments of these authorities work slowly, too). By the way, new RT-promo-spots are currently produced and will be available soon. Details coming up in one of the next issues. And now let's start with the

NEWS

Radio Dublin has changed its frequency to 6930 kHz, but unfortunately this change also results in a worsening of the transmitter's modulation. Radio Dublin can be contacted at 58 Inchicore Road, Kilmainham, Dublin 8, Eire.

The Dutch Relay Service intends to suspend its regular transmissions for at least a month due to pressure from the PTT. However, the station hopes to be back as soon as possible since their recent transmissions on 7383 kHz have proved to be quite successful. Listeners' feedback is welcome at: Postbus 81, 3450 AB Vleuten, Netherlands.

The Free Radio Service Holland (Postbus 41, 7700 AA Dedemsvaart, Netherlands) told us they will be

on the air for 2 hours or more on 19th July. The frequency used on this day will be possibly 6205 kHz. On 30th August the FRSH will celebrate its 7th anniversary with special programs on two frequencies. That means there will be no 3rd Sunday broadcast in August! August will also see the introduction of a new package of jingles and promos. Furthermore, FRSH is still negotiating with prospective relay-stations. At this stage no details can be announced, because nothing is certain. Please take note of their info regarding FRS-Sales Productions!

FRS-SALES PRODUCTIONS
After a massive re-organisation we proudly announce the relaunch of our sales-services. Brandnew lists containing a wide variety of (new) recordings and a full range of video-tapes! Convince yourself and order today. Send 1 IRC or a 75ct/80pf stamp and you'll receive our full lists! FRSH, P.O.Box 41, 7700 AA in Dedemsvaart, The Netherlands.
ONLY ONE CAN BE THE CHEAPEST...

Radio International has been heard with a number of broadcasts of late on 6225 kHz which consisted of German MOR or 70s disco music along with tentative live IDs in German. On 28th June, the station announced this address for correspondence: P.O.Box 1202, D-4709... in West-Germany. Strangely enough, the city name wasn't given out in contrast to the postal code! It was also announced that listeners may write to the station through the well-known maildrop addresses although as long as these address services haven't given their permission, you should only try to use the address given above.

A programme of Radio Marabu Int'l (P.O.Box 220342, 5600 Wuppertal 22, West-Germany) could be heard on 6240 kHz last Sunday. This programme was probably relayed by Radio Rainbow International. Speaking of Radio Rainbow: Anoraks UK reports that a special two hour "Free Radio Show" presented by Kieran Murray was heard on this station on 21th June. Kieran now takes a holiday break for a couple of weeks, but the programme will be back some time in July. The address of Radio Rainbow Int'l is 151 Moneymore, Drogheda, County Louth, Eire.

The current schedule of the Satellite Broadcasting Company (Wuppertal-address) is as follows:
On Saturdays, SBC can be heard every two weeks on 6290 kHz. These shows last 90 minutes including the English service with Roger Davis. Swedish shows can also be expected soon.
On Sundays, SBC broadcasts one hour shows on 6295 kHz. In addition, the regular transmissions on 6280 kHz (via Westside Radio) will

Issue 103 / Vol. 4

16th July 1987

c/o P.O. Box 10 37 71. D-2300 Bremen I. West Germany.

Hello Telex-readers,

It's time again for a new edition of RADIOTELEX. And so yours truly has to sit on his desk instead of lying in the sun on this beautiful summer day.
Unfortunately, the postal authorities still seems to have summer holidays. A letter from West-Berlin to Bremen took 3 days till it reached our post box! That's the reason why some letters didn't arrive in time again.

We also thank this weeks' contributors for their great support by sending their logs and news. By the way, the quality of this mag depends on your contribution! So, if you receive some Free Radio stations, why not share your logs and news with other fellow-readers by sending them to us next time.
Your contribution is always welcome !!!

Keeping the Fight for Free Radio alive and kicking!

PFBS RADIO

SUNDAYS ON 60, 48 AND 41 METRES SHORTWAVE!

L A T E S T N E W S

The engineer of Radio Aquarius Int'l told us that he won't enjoy the summer fun due to work at RAI's transmitter. On 6th September 1987, RAI will be on the air on 9350 kHz between 0900 and 1000 UTC. This frequency change will be made in order to improve reception in countries like GDR, Switzerland, Italy and Czechoslovakia. At present, the station uses 7485 kHz. Reception reports are welcome at Postbus 65027, 3002 DA Rotterdam in the Netherlands.

On 26th July, Radio CLCG (P.O.B. 540101, 4100 Duisburg, West-Germany) can be heard with the "CLCG International Show" and perhaps also German programmes via Radio Telstar on 6220 kHz at 0900 UTC. Furthermore, they're looking for a station, which is prepared to relay their CLCG-programmes once a month. Any stations, who are interested on that subject can write to the above CLCG-address.

Barrie and Ruth Johnston
ANORAKS U.K.
P.O. BOX 539
BLACKPOOL FY1 4RE
England

Interference: Radio Praha was received on 6220 kHz in parallel to 6055 & 7345 kHz on 5th July, but the mode was quite poor. Let's hope the station will not use this frequency in future.

A letter sent to the address of Radio International as printed in RT 102 was returned by the post office meanwhile. It appears that that address has been a hoax... in any case, other DXers' experience with that address would be appreciated!

Radio Kristel International, 514 Brighton Road, South Croyden, Surrey, England, will be back with their next scheduled broadcast on 26th July between 0800 and 1200 UTC with the following line-up of presenters:

0800 Martin Caine / 0900 John Graham / 1000 Jeff Allen / 1100 Steve Day / 1200 Closedown.

At present, the station operates with a 15-watt-tx along with a half wave dipole horizontal aerial.

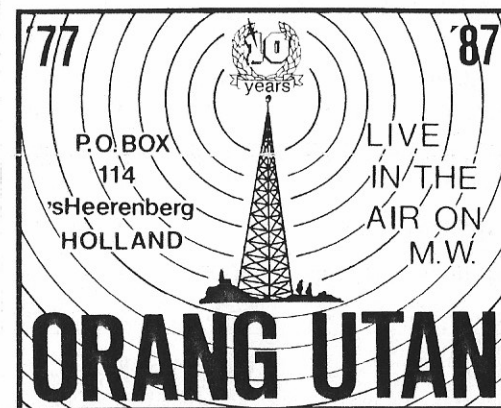

Radio Marabu International (P.O.Box 220342, 5600 Wuppertal 22, FRG) will also broadcast via Radio 101 on 7361 kHz as long as the owner of Radio 101 is at the transmitting site in Ireland.

Radio Orang Utan plans to be on the air again on both 26th July and 02nd August this year. Although no frequency was given it is likely that these broadcasts will take place on the "good old" 180 mb. following the station's recent test on 1625 kHz on 27th June. The address: Postbus 114, s'Heerenberg, Netherlands.

Radio Pogo 104 will be relayed by Radio Tutench-aman in the 48 mb. very soon. RTUT apparently prefers to relay programs of other stations than transmitting their own shows. You can contact both stations at the well-known Wuppertal-address.

Rainbow Radio Germany informs us that their programmes will be broadcast via Radio Waves Int'l on 6275 kHz and Westside Radio on 6280 kHz within the next 5 weeks. In addition, transmissions via Riverside Radio in the 48 mb. will be made on Saturdays and Sundays in that period. Listeners' mail should be sent to Postbus 178, 7240 AD Lochem in the Netherlands.

UNID: The station which was logged on 6293.5 kHz June 14th with 60s offshore airchecks was indeed Radio Nova Belgium (Postbus 5, 2638 Reet, Belgium). That day the station experienced some problems with its audio system and for that reason played offshore recordings instead of the normal programming.

Yet another new station is Radio Star International. That station could be heard on 6280 kHz with a relay transmission via Westside Radio. Radio Star can be also reached at P.O.Box SH9, Sheerness, Kent ME12 1AQ, England.

Radio Stella International (23 South Beechwood, Edinburgh EH12 5YR, Scotland) should next be audible on 09th August 1987 between 0900 and 1100 UTC on 7384 kHz. The station also hopes to use 6318 kHz within the next month or two. That outlet will be running on approximately 200 watts. RSI normally occurs on the 2nd and 4th Sundays of each month.

Wildwood Radio has tested on 6300 kHz and 6350 kHz for a couple of weeks. Due to interference from other stations they have decided to use 6308 kHz in future. The first test on that frequency took place on 19th July 1987. The stations format is current pop music and oldies. There are plans for a DX corner (regular SW stations and Free Radio), too. The address of WR is Postbus 19074, 3501 DB Utrecht, Netherlands. By the way, the power output of the station's transmitter is approximately 10 watts feeded into a half-wave dipole.

W.L.R. (23 South Beechwood, Edinburgh EH12 5YR, Scotland) will be back with their next broadcast on 7384 kHz August 2nd, 1987. Luis Nieto who formerly ran Radio Woodstock and was fined in court twice is said to be on shortly with his own programme on W.L.R., but is very busy meanwhile with business commitments.

Apart from their regular transmissions on 7361 kHz, Radio 101 (P.O.Box 2, 4680 Gemmenich, Belgium) was often on the air in the 11 metre band in the last two weeks. They also made some QSOs under the name of "Alpha Echo" with German CB radio operators, in which they also gave some infos about their equipment. Radio 101 uses a Dutch 22 channels transmitter which has 70 watts output and a 4-element-yagi-beam antenna on a lattice mast.

After all these news from the Free Radio scene we have enough space to show you another QSL oldie from the 70's:

And now it's time to finish this bumper issue of RADIOTELEX. Some RT subscribers will already find an address label written by our computer on their envelope. From the next issue onwards, all addresses will be managed by that computer. O.k, it's time to say goodbye. Deadline for RT 105 is on ++ 13th August 1987 ++

30th July 1987

c/o P.O. Box 10 37 71. D-2600 Bremen I. West Germany.

Hello Free Radio enthusiasts,

It's once again RADIOTELEX-time today.

We were snowed under in the last two weeks by letters containing loggings and news from the Free Radio scene. Wonderful !!! It borders on the miraculous that we have found the way to the type-writer among all those letters, hi.

A big thank you to all contributors of this issue for their great support. We hope you will continue your contribution in future. By the way, the reception conditions on 19th July were very well, resulting in a large list of loggings for that day. And as we also have a great amount of news and further loggings, we will immediately start with the

Radio Onbekend who made a broadcast on 3rd May 1987 on 6224 kHz uses a French Army transmitter type BC 610E transmitting on MW and SW, mostly on 180 metres coupled to an aerial of 15 metres. The frequency for the next transmission on SW will be 6220 kHz. You can contact the station at Postbus 24, 7260 AA Ruurlo, Netherlands.

Radio Orion (82B Edgewood Road, Rednal, Birmingham B45 83G, England) told us that plans for using 6320 kHz have been abandoned as the staff believes it is best to stick to one channel, 6290 kHz. By the way, it wasn't Orion who relayed John England's 4FWS with the election broadcast on 6207 kHz June 6th !

Radio Pamela plan to limit short wave broadcasts to one a month - with a power of 50 watts - whilst the station concentrates on medium wave programmes once more. In addition, relays will be carried out for Radio Unicorn, Satellite Broadcasting Company and Radio Torenvalk. The address of Radio Pamela is 3 Rosewarne Cottages, Rosewarne Downs, Near Camborne, Cornwall TR14 0BE, England. (Wavelength 16)

Radio Hot Wire International (out of order, sorry !) was on the air for the first time on 6330 kHz on 19th July. That is probably the new name of the former Radio Europa International which was quite active on the same frequency at the beginning of 1987. Radio Hot Wire Int'l uses the old FMTR-address: P.O.Box SH9, Sheerness, Kent ME12 1AQ, England.

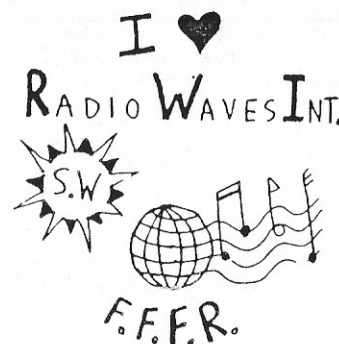

On 26th July, another new station - obviously of Dutch origin - appeared on the SW bands and identified itself as Radio Peter Bell. Although the station used 6317 kHz, it was announced that the transmission took place on 6380 kHz. We are not quite sure about the correct spelling of its name, because the DJ spelled everything except the station's name in his programme. However that may be, the address is Postbus 65, 7260 AB Ruurlo, Netherlands.

Riverside Radio (P.O.Box 39, Waterford, Eire) will shortly be testing 7373 kHz in the 41 metre band.

On 26th July a station called R T R announced test transmissions and gave out an address of P.O.Box 140, Ashford, Kent, England. The address has been used before by "Reel to Reel Radio". The initials certainly tie in. (Anoraks UK)

Radio Scorpio (Postbus 19074, 3501 DB Utrecht, Netherlands) can now be heard every first Sunday of each month from 0800 till 1200 UTC (October-March 0900-1300 UTC) on 6312 kHz via Radio Ireland International. Current DJs at Scorpio are Sam Spade, Brewford T. Justice, Harris, Tom Lorenz and from time to time Oberst Gaddafi.

++LAST MINUTE INFO: The operator of FMTR was originally fined £ 600 on 22nd July. But the fine was now reduced to £ 300. ++++++

Abstract

D.T.I. Information: The Radiocommunications Division of the DTI have just produced their first annual report. It is available free from the DTI by calling their 24 hours answer machine phone number 01 275 3072 and leaving your name and address. You can also write to the Library Room 605, Waterloo Bridge House, Waterloo Road, London, England. The report is some 60 pages long and in full colour. It includes a large photo of Laser 558 and a photo of Radio Jackie having its antenna removed plus a list of prosecutions and fines on pirate broadcasters.

Radio Dutchboy has been raided recently by the Dutch PTT but intends to be back shortly with test transmissions. The address of Dutchboy is Postbus 87, 7710 AB Nieuwleusen, Netherlands.

The Free Radio Service Holland (Postbus 41, 7700 AA Dedemsvaart, Netherlands) informs us that there is no "FRS Goes DX" magazine in July due to the happy holiday season. Remember that FRS-Holland will be back on 30th August to celebrate their 7th anniversary.

Radio Hexagon International with DJ Richard Grahame should be having its next broadcast shortly via Radio Ireland International on 6312 kHz. Listeners' mail can be sent to 10 Bromyard Crescent, Paulsgrove, Portsmouth PO6 3SP, England.

Radio Indigo is the name of a Dutch station which will broadcast via Riverside Radio on short-wave very soon. Radio Indigo started its transmissions on FM in 1984, but due to disagreements between the DJs, those transmissions were suspended at the beginning of 1985. On 5th April and 31st May 1987, the station has broadcasted via Radio Delta (Ruurlo) in the 160 metre band. At present, the crew of Radio Indigo consists of two DJs - Henk and Harry. Reception reports are welcome at Postbus 122, 7160 AC Neede or Postbus 19074, 3501 DB Utrecht in the Netherlands.

INTERFERENCE: According to the observations of one RT-subscriber the signal of Radio Praha on v6222 kHz - as stated in RT 103 - was caused by their 6055 khz transmitter. Each time Radio Praha could be heard on that frequency, it could be also heard on v5888 kHz. That means: 6055 kHz $\pm$ 167 kHz.

According to Anoraks UK, the broadcast of Radio Ireland International on 12th July (see loggings in RT 103) was an old recording from about one year ago. After the end of that recording, station operator Tony announced that the "Two Tony's Show" was now being aired on a Thursday night on Pulsar 98. Probably, the station will be then relayed on 6312 kHz. The address of Pulsar 98 is Unit 2, Balbriggan Shopping Centre, Balbriggan, Co. Dublin, Eire. By the way, airtime via Radio Ireland International can be hired for £ 5 per hour. Write to 31 Mountjoy Square, Dublin 1, Eire for further details.

Radio Jorstick could be recently heard with the first of four shows being relayed by Radio 101 within the next 12 months. Listeners who send RJOY reception reports for each of those shows will receive a little present from the station. Send your reports to P.O.Box 22 03 42, 5600 Wuppertal 22 in West Germany and ask for their new info-sheets, too.

flashback to Radio Hauraki when they operated on 121 and Tiri II in the late 60's. By the way, the programme of 4IFR usually consists of music from New Zealand and Australia. Reception reports should be sent to 4 Mountjoy Parade, Dublin, Ireland.

Some news from another exotic station - Indian Ocean Broadcasting System - arrived these days. The transmitter of IOBS is ready for use and the first tests were quite successful. IOBS could be heard upto 400 miles with SIO=444. The power output is 30-40 W and the frequency used at present is 3.4 MHz as soon as the harmonics (e.g. 3.4 x 2, 3.4 x 3....). By the way, the first European transmission of IOBS relayed by Radio Tutenchamun will be delayed, because the station hasn't found an address till today. However, we have decided to make our address available to IOBS. So, you can contact the station at c/o RT for the time being.

Radio Moneyburner is the name of a new German station transmitting with its own transmitter. The first transmission of that station will likely take place in August on a frequency of 5300 or 5310 kHz. Radio Moneyburner uses the following address: Postbus 41, 7700 AA Dedemsvaart in the Netherlands.

East Coast Commercial said in their recent DX-programme that Radio Pamela doesn't use the Rosewarne Cottages-address any longer. Unfortunately, the reception of ECC was too poor to understand the new address of Pamela. Anyone, who can help us ??? (Steve - "Most" moving FR operator, hi).

On 23rd or 30th August, Rainbow Radio Germany (Postbus 178, 7240 AD Lochem, NL) plans to make a 90 minutes transmission in the 180 m.b. at 2300 or 2330 UTC with the following line-up:
2300 (resp. 2330) Mike Hamilton's Musicbox
2330 (resp. 0000) Dutch Service DJ Henk
0000 (resp. 0030) Dave's Heartattack
Furthermore, the station will be on the air with live transmissions on 180/199 metres at 3 weekends in September. Transmitting time is at about 2300 UTC.

Steve Masters of RTR International told us that he uses a home-made crystal controlled 10 W-transmitter on SW coupled to a half-wave dipole. He formerly operated Reel to Reel Radio on 105.3 MHz for which his court case for this comes up on Tuesday, 25th August 1987 at Ashford & Tenterden Magistrates Court at 1000 BST at Tufton Street, Ashford, Kent. By the way, the address of RTR Int'l is P.O.Box 140, Ashford, Kent, England.

Some news also arrived here about Radio Star International (P.O.Box SH9, Sheerness, Kent ME12 1AQ, England). The operator of that station, Brian Richards, was a former presenter with FMTR. At the moment, Radio Star Int'l has no plans for an own transmitter.

All news station Radio Unicorn is currently suffering from problems of how to get regular information from colleague shortwave pirates since some recent pleas for news have turned out to be not very successful. In addition, the station's latest programmes have not been aired for an unknown reason. All this might mean that this for the moment will be the end of Unicorn for a few months or so.

So far for this edition of RADIOTELEX. Many thanks to all our contributors. Here is still the quotation of the fortnight (from Radio Mr. Sandman): "...maybe on 6205, if the frequency is free, if not: we make it free, with a lot of power...!" Bye bye from

Issue 105 / Vol. 5

13th August 1987

c/o P.O. Box 10 37 71. D-2600 Bremen I. West Germany.

Hi freaks,

First of all, we have some very interesting news for you regarding RADIOTELEX. A shortened issue of RT (without advertisements, illustrations and QSL survey) can be also subscribed in the GDR from now on! And there are also some DXers from Romania and the Soviet-Union who are interested in receiving RADIOTELEX. However, our GDR representative still needs the help of our Western readers. He is still looking for a type-writing machine and duration stencils (in German called "Dauerschablonen"). In exchange, he offers LPs, the antenna book by Rothammel etc. So, if you possess an old type-writing machine which is of no use for you or if you have the possibility to get duration stencils, please drop us a line and we will forward your letter to him. Furthermore, we have some news regarding the SAE service: Dutch 75 cent stamps are now available again. And last but not least, we can tell you that two new RT-promo-spots are now available, too. FR stations can get one copy of them free of charge. Other subscribers or FR stations who want to support our finances should send us double return postage or 2 IRCs. And after that long introduction, here's the

L A T E S T N E W S

In July, Britain Radio International (Postbus 19074, 3501 DB Utrecht, Netherlands) was on the air for only one hour (c/f RT 103), because they were busy with installing some new equipment in their "main studio". The next regular transmission of BRI will be on 23/08/1987. It is also possible that they will broadcast a "MOA-Special" on 16th August 1987.

Radio Caldonia and Aquarius (Postbus 65027, 3002 DA Rotterdam, NL) were on the air again August 2nd with a joint broadcast on 7470 kHz (announced as 7485 kHz). On that occasion they announced that both stations will be changing to 31 metres this month, and a nonstop music test is likely to take place either August 23rd or 30th on 9400 kHz (c/f RT 103).

Error-Dept.: Radio Joystick (P.O.Box 220342, 5600 Wuppertal 22, FRG) told us that in contrast to RT 104 - the RJOY show recently aired a few times by Radio 101 was not one of the four 30 minutes shows, which are planned to be broadcast via 101. A little bit confusing, but we are sorry for that incorrect news item in RT 104. In the meantime, we are also able to give you the exact dates of the 4 RJOY-shows. Those are as follows (in brackets is the date of the repetition):

Show No. 1: 27th September 1987 (14th February 1988)
 Show No. 2: 04th October 1987 (21st February 1988)
 Show No. 3: 06th December 1987 (24th April 1988)
 Show No. 4: 13th December 1987 (01st May 1988)
 Transmitting time is always from 0930-1000 UTC on 7361 kHz.

Falcon Radio is lying low at the moment apart from a few odd relays over Radio Skywave Int'l from Ireland on 6850 kHz. The operators feel that there is no real need for Falcon at present which is the main reason for taking a long rest. Nonetheless, Falcon hopes to be back to weekly broadcasts at one time.

4IFR from New Zealand informs us that they only received one report for their recent transmissions via Westside Radio Int'l in May and June this year. Their September show (also via WRI) will contain a

Following the raid on Radio Orion, several months ago, the operator has now received four summonses and will appear at Sutton Coldfield Magistrates Court at 1000 UTC on 14th September. Apparently, one reason for the raid was following a complaint from the Danish Military, who use 6280 kHz. (Anoraks UK)

Radio Pamela could well be trying night-time broadcasts to North America between approximately 0200 and 0400 UTC on either 6815 kHz or 7140 kHz.
By the way, the new contact address of Pamela is Flat "A", 129B Milton Road, Gravesend, Kent, England. This address was also used by Radio Mongoose late last year.

On 23rd August, the Pirate Freaks Broadcasting Service (PFBS) was on the air on two frequencies, 6293 kHz and 6315 kHz. But due to problems with the modulation the 6293 outlet had to be switched off prematurely. However, these problems will be solved till the next broadcast of PFBS, when they will be on the air in the 48 m.b. as well as 5295 or 5300 kHz.
Reception reports about the 60 m.b. transmissions are verified by a special QSL card. Send your reports to Postbus 41, 7700 AA Dedemsvaart, Netherlands.

Radio Radar is the name of a new station, which plans to be on the air with DJs Steve Most & Robbo on 6761 kHz. Other possible frequencies could be 6868 or 6835 kHz. The power output of Radio Radar's transmitter is 20 to 25 Watts.

Now we still have some space for another Q S L - S U R V E Y :

station	freq	days	sent	received
R. Sounds Int'l	6261	24	1 US-D	QSL-card, info, pers. letter
R. Kristel Int'l	6292	26	DRP	QSL-card, info
R. Perlee	1094	31	DRP	QSL-card, A4-poster
North Dublin Com.R.	6311	33	2IRCS	QSL-letter
Satellite BC Comp.	6268	13	2IRCS	QSL-card
R. Hexagon	6220	13	2IRCS	pers. letter, IRCs returned

radiotelex

Issue 106 / Vol. 5

30th August 1987

c/o P.O. Box 10 37 71, D-2300 Bremen I, West Germany.

Hello pirate lovers,

More than two weeks are over and we were unfortunately forced to write this edition of RADIOTELEX three days later than usual, because we hadn't got any letters from Great Britain until the planned deadline on Thursday. So we write this edition on Sunday and we will already include some loggings of today, which were made at our headquarters. Sorry for the delay!
By the way, some of our subscribers suggested that we should write the names of the log-contributors (or only the first names, initials or cities) at the end of the RT-Logbook. Any comments regarding that idea, especially from our regular contributors, are very welcome!
Thank you very much to all contributors who have sent us their loggings or news in the past two weeks!
And now it's time for the...

L A T E S T N E W S

Before starting with the news, we want to call your attention to a great FR-meeting which will take place in the "Sauerland" nearby Lüdenscheld (West-Germany) on Saturday, 12th September 1987. All persons who are interested to take part at that meeting should send their registrations until 05th September 1987 to PIN, P.O.Box 220342, 5600 Wuppertal 22, West-Germany. Please also enclose an SAE (0,50 DM stamp) for further details as well as the description of the route to the meeting.

Radio Dublin has changed its frequency to 6910 kHz again. However, the modulation still is quite poor.

Süd-West Radio, Radio California and Radio Limit International made a joint broadcast over SWR's transmitter on the occasion of the DX camp in Merschweiler/Saar (Southern Germany) on 23rd August. The name used for that special transmission was German Free Radio Corporation. You can contact the station at c/o SWR, P.O.Box 1471, 6990 St. Wendel, West-Germany.

Radio Nuova Musica from Pordenone is back on shortwave again and could be recently heard with daily transmissions on 7556 kHz. That station was regularly on the air at the beginning of 1985 and suspended then their transmissions for unknown reasons. The last address used by Radio Nuova Musica was Via Burrida 24a, 33080 Porcia (PN), Italy.

For the biggest selection of free radio merchandise, incl. "Weekly Report" and medium wave frame aeriels...contact "ANORAKS U.K.", P.O. BOX 539, BLACKPOOL, FY1 4RE, ENGLAND.

Radio Titanic International
(Postbus 41, 7700 AA Dedemsvaart, Holland) celebrated its 12th birthday on 06th September 1987 on three frequencies with three different shows in the 48 mb. using three transmitters on a single site in Mid-Europe. The staff informed us that still the mail for the June transmission didn't reach the operators probably due to staff holidays at the Dutch P.O.Box. So the people who wrote in now and then should be patient, there will be an answer from the station as soon as possible. By the way, is there any other station using the Dedemsvaart-address having the same problems ??? If so, please send a note to RTI. The next transmission of Radio Titanic Int'l will take place next year hopefully, when they are celebrating their 13th anniversary.

Radio Torenvalk had finally his first successful test ever with a transmitter of their own on 16th August 1987 on 6200 and 6220 kHz (c/f logs RT 106), according to several reports and even an angry remark from Bremen's coast-guard. Since their power was 25 watts they have now serious plans for shortwave transmissions. Frequencies will be either 6205 or 6220 kHz. By the way, Radio Torenvalk was also the station which could be recently heard under the name of Radio Yankee-Dudle. Contact address for both stations is Postbus 36, 7010 AA Gaanderen, Holland.

W.L.R. (23 South Beechwood, Edinburgh EH12 5YR, Scotland) plans to do a transmission on 01st January 1988 using the name Radio North Star only for New Years Day. They have already used that name in early 1986. The current schedule of W.L.R. is as follows: On the 1st Sunday of each month they are using 7315 kHz and on the 3rd Sunday 6318 kHz. By the way, W.L.R. uses the same transmitter as Radio Stella International.

So much for the news today. Many thanks to all contributors who were kindly enough to send us their news ! The rest of this page will be used for the QSL - SURVEY :

station	freq	days	sent	received

We are now coming to the end of this 6 pages issue of RADIOTELEX. Don't forget that the summer time ends in most countries on 27th September and that means UTC = CEST - 1 hr ! Anyway, deadline for RT 108 is on 01st October 1987 and let's hope that that edition will be published punctually. Until then, Keep on fighting for Free Radio,

RT

radiotelex

Issue 107 / Vol. 5
19th September 1987

c/o P.O. Box 10 37 71. D-2600 Bremen I. West Germany.

Aloha Telex-readers,

It's a sin, but we can't change it. This edition of RADIOTELEX appears some days too late again. The reason for the delay was the fact that the chief-editor was ill last week. And without him works nothing. So, we must apologize for the delay once again. In the last weeks, we have apparently some problems with our post-box. The majority of your letters reached us, but a few letters were returned to the sender. So, we give you the following advises for your future letters to our headquarters: Please write only "R.T." on the envelope instead of the full name OR just omit "R.T." by only writing the P.O.Box-number etc. on the envelope. And don't forget to write "c/o" (care/of) before the POB-number ! If this procedure shows no success further steps will be taken by us. Well, someone suggested that we shall publish RADIOTELEX on a Sunday in future. Of course, this would result in a more up-to-date magazine ! We at the HQ think it's a good idea. But to realize that idea, we need the help of our readers resp. contributors. So, we ask you whether there are any readers who are prepared to phone us every two weeks on a Sunday afternoon/evening in order to give us their latest logs (also from Scandinavia or Great Britain) ??? If so, please drop us a line ! And if we find a few persons who can support us in that way, we will make RADIOTELEX to the most up-to-date shortwave FR-magazine. If not, RADIOTELEX will continue on its Thursday deadline base. Next item: Thank you very much to Claes for supporting our GDR representative by sending him a type-writer ! Speaking of our GDR representative, here is a little bit of statistics: The shortened issue of RADIOTELEX was sent to 30 OMs in the GDR, 12 in the USSR and 3 in Romania. We would be very glad, if those of you who run a Free Radio station will announce in their programmes that RADIOTELEX can also be subscribed in East-European countries. Details can be obtained via the Bremen-address. Many thanks in advance ! And after this very long introduction (one of the longest ever written), it's now time for the hottest logs in the

That's the end of our today's logbook. A big thank you to the following contributors from Duisburg, Norden, Lauterbach, Bremen, Berlin, Celle, Taunusstein (all West-Germany) as well as Ljugarn, Norrköping (both Sweden) and Turku (Finland) and Guernsey, Cornwall as well as Anoraks UK from Blackpool (all UK)! We hope you all will continue your contribution in future, too.

L A T E S T N E W S

Phil Collins (don't confound him with the famous pop artist), operator of Radio Cavendish told us that he used only 8 watts coupled to a half-wave long-wire for his Bank Holiday broadcast on 6291 kHz on 31st August 1987. He ended up his transmission with having a QSO with Orion and someone called RGI from Scotland. Listener's feedback is welcome at P.O.Box 629, Eastbourne, Sussex, UK.

We are now able to solve the mystery about Radio International. Radio International broadcasts irregularly on 100.6 MHz with 20 watts, 1485 kHz with 300 watts and on 6225 kHz with a power of 10(0) watts. You can contact the station at c/o Klaus Doerholt, Gedächtnisstr. 5, 4709 Bergkamen, West-Germany.

The operator of KIWI Radio, Graham Barclay, was unable to reply to mail lately, because he is recovering from an accident. Letters should be answered shortly. KIWI Radio has also been testing on 75 metres to South Pacific recently. The mailing address of KIWI is P.O.Box 1437, Hastings, New Zealand.

Maple Leaf Radio plans to have proper QSL cards printed soon. At present using QSL sheets and have 4 different designs available. QSL address for that station is P.O.Box 1133, Valley View, Alberta, Canada T0H 3N0.

The operator of Radio Mirage (P.O.Box 2778, Elverhoy, 9001 Tromsø, Norway) informs us that he was the guy who relayed both Radio Pogo 104 and Beattle Radio on 6279 kHz on August Bank Holiday (31st). He has sent two tapes of Pogo 104 to Prince Terry of Westside Radio, in the hope that he will relay them on 6280 kHz. By the way, the address of Beattle Radio is the same as Radio Mirage's.

Radio Nightshadow is the name of a new station of Dutch origin which could be heard with a test transmission on 6200 kHz on 13th September. Radio Nightshadow can be reached at Postbus 43, 7010 AA Gaanderen, Netherlands.

Steve Most of Radio Pamela told us that on Saturday, 05th September 1987 he was on the air at 0640 to around 0930 or 1000 UTC on 6270 kHz with 50 watts. On that day, he put out a Radio Hexagon show, a Satellite Broadcasting Corporation tape and also some Radio Pamela test tapes. Send your reports to Flat "A", 129B Milton Road, Gravesend, Kent, England.

+++L A S T M I N U T E I N F O+++L A S T M I N U T E I N F O+++
According to Radio East Coast Commercial, Steve Most of Radio Pamela was raided on 13th September 1987 !!!

The station by the name of Radio Peterbell (Postbus 65, 7260 AB Ruurlo, Netherlands) was in fact Radio Delta which can be usually heard on 180 metres. However, on 26th July 1987, they broadcast on 6318 kHz using a BC 610E transmitter with 750 watts and an antenna which was 40 metres long and 18 metres high.

PIN-Magazine, P.O.Box 220342, 5600 Wuppertal 22, West-Germany, offers a detailed frequency and address list for all non-German-speaking DXers. That list is published every two months and a single issue costs just 50p (please write then to Anoraks UK, P.O.Box 539, Blackpool, FY1 4RE, England) or 1 US-D (outside UK and Ireland). A one-year subscription (6 issues) will cost you £ 3 or 5 US-D. Please send your subscription orders to the Wuppertal-address only !

The Pirate Freaks Broadcasting Service (Postbus 41, 7700 AA Dedemsvaart, Holland) celebrated its 2nd anniversary on 13th September 1987. On the occasion of that anniversary they have published a brand-new 8x A6 pages info-booklet, which can be obtained for return postage.

The Finnish Free Radio Right Wing Radio is still alive. At last, RWR found and bought a SW-transmitter and test transmissions will now start in September from Finnish soil on both 6206 and 6225 kHz. RWR T-shirts are also now available. A white shirt with black RWR scull logo printed in A4-size (M, L and XL available) can be ordered for DM 20 or FMK 40 from RWR, P.O.Box 220342, 5600 Wuppertal 22, West-Germany.

The operator of Spectrum Leisure Communications (BM Broadcasting, London WC1N 3XX, England), Jay Burkette, entered into a joint agreement with another station namely Border Radio who will also use the same transmitter and address as Spectrum. So this is definitely not a "relay". Border is operated by Harry Marshall and his programmes will feature both classical and easy listening music, a format not featured much on shortwave.

Radio Sounds International (P.O.Box 220342, 5600 Wuppertal 22, West-Germany) wrote us that their recent programme on 06th September was their last show till early 1988, because they have to move their studio location.

Radio Stella International, 23 South Beechwood, Edinburgh EH12 5YR, Scotland, broadcasts from Ireland now and announces the following schedule: Radio Stella is on the air on 6318 kHz on every 4th Sunday between 0800 and 1100 UTC. On the 2nd and 5th Sundays, they will use 7315 kHz at the same time.

Superclan Radio (Postbus 30025, 6803 AA Arnhem, Netherlands) made a surprising return to the airwaves on 06th September 1987. On 13th September, they changed their frequency to 6204 kHz which will be also used in future. On that day, they relayed Caroline 558, followed by a Superclan programme by Rob Charles, which was apparently taped specially for the station when Rob was on board at the Ross Revenge. Superclan Radio was also heard on Tuesday, 08th September with tapes of old Monique programmes, as well as relays of several Dutch Free Radio stations. These tests were carried out on 6204, 6220 and 6258 kHz. (Anoraks UK & RT-monitor)

constructing equipments and studios. "We cannot wait" was the answer of Ian Anderson.

6205 kHz will be occupied for god in future ! Dutch evangelist Johan Maasbach plans to transmit on that frequency under the name of World Mission Radio (station W.M.R.) with 10 kW E.R.P. 24 hours a day. According to a map sent to us, the transmitting site is at the South East coast of England. Rumours says that W.M.R. will transmit from board of the Ross Revenge. The address for that station is P.O.Box 346, Corona, California 91719, USA or 714-737-4497 for those of you who prefer to phone.

Radio 48 has changed its mailing address to P.O.Box 629, Eastbourne, East Sussex, England. They also use Postbus 19074, 3501 DB Utrecht, Netherlands since 1984.

Following the raid on Radio Pamela on 13th September, when the DTI removed a 50 W shortwave and a 125 W mediumwave transmitter, here is an extract of Anoraks UK's "Weekly Report" informing you about further details of the raid: "Yesterday, Radio Pamela was raided by 2 DTI-and 2 police-men at 13:45 BST whilst in the midst of calling a CQ (with Westside Radio). They had luckily finished their programmes, and all those were out of the way. All the studio was taken as well as 2 radios one being a MW/FM stereo tuner not even being used. Also 2 CB radios were taken, which were not connected either, nor being used for the station. Steve Most (OP of Pamela) asked the DTI what they were up to, taking the CB radios, and they said "all must go that we think may of been used at sometime for your station". The DTI also asked Steve how long ago the MW had been used. When asked why, they replied they had been monitoring 186m for some months and it was well known about. Each time Steve asked the DTI any questions, he was told by the Police to stop asking stupid questions ! He was also told not to go and see the lawyer, as he had not yet been prosecuted, and they had to have words with their "boss" about what is to happen ! The DTI officials inform Steve that the studio items and the radios etc. would be returned, but they would strongly urge for the transmitters to be confiscated. Steve also informs us that two other stations were raided before Pamela. One was Radio Radar, who were visited at 13:00 BST, and at the time were operating for the first time on 6761 kHz (see logs in RT 107). The name of the other station is not known, but it was local to the Kent area. Radio Pamela wish to say thanks to all those who have supported them in the past with letters and encouragement. Pamela hope to be back as soon as possible.

Well, Radio Pamela was the third station raided so far this year. One interesting point to note is that all three stations (F.M.T.R., Orion and Pamela) were all ones who appeared regularly each Sunday, and every day in the case of Radio Orion. Speaking of Radio Orion: The operator was recently fined £ 200 at Sutton Coldfield Magistrates Court. The case was a result of the raid on the station on 24th February 1987. At the time, Mike Wilson, the operator was confident that the search warrants were not in order, as they had been signed by a Magistrate from the wrong district. However, the law works in mysterious ways and he received a summons anyway. Mike also had to pay £ 125 costs, although this was much less than the prosecution had asked for (£ 560), claiming that they had spent 15 hours tracking the station down."

So much for today. Deadline for RT 109 is on 15th October 1987 (a Thursday yet). We are still looking for some persons, who are prepared to phone us regularly or irregularly on Sundays in order to give us their latest logs, so that we can publish RADIOTELEX on a Sunday in future and can offer you the most up-to-date SW-FR-magazine. Many thanks to all contributors of this edition, 64 9 & FFFR

radiotelex

Issue 108 / Vol. 5

01st October 1987

c/o P.O. Box 10 37 71. D-2600 Bremen I. West Germany.

Hurray, Hurray !

You won't believe it, but this edition of RADIOTELEX was published punctually ! Yes indeed ! Regarding our SAE-service we must tell you that we have only a few Dutch 75ct stamps available at present. So we especially ask our Dutch readers, whether they can help us by sending 75ct stamps. In exchange, we can offer you (and of course all other readers, too) British 18p, French 2,20 Fr and German 0,80 DM stamps. Well, reception conditions were fairly good in the last two weeks. Many stations could be heard with a strong signal, as you can see in our logbook below. So, here it is:

L A T E S T N E W S

Britain Radio International and Radio East Coast Commercial will use 6200 kHz in future due to interferences with a splatter of 15 kHz caused by Radio Rainbow's transmitter on 6240 kHz. Radio East Coast Commercial will broadcast every 1st Sunday and Britain Radio International every 2nd and 4th Sunday of each month on that frequency.

A transmission of Radio Buttercup International could be heard on 6273 kHz on 20th September. The station claims to be coming from the East coast of Ireland and gave out an address of 151 Moneymore, Drogheda, County Louth, Eire (that address should remind you on Radio Rainbow of course).

From October onwards, Radio Marabu International (P.O.Box 220342, 5600 Wuppertal 22, West-Germany) will resume its regular transmissions on shortwave. So, you can hear Marabu every 2nd Sunday between 1000 and 1100 UTC on 6318 kHz (via the Scottish FR Network) in future. On 11th October 1987, a test-transmission will take place on that frequency with shows presented by Mark Graison and Paul Jones, followed by the official reopening of Marabu's programmes on 08th November 1987.

Radio Nuova Musica, which could be recently heard on 7556 kHz, informs us that the power of their SW-transmitter is 100 watts. They are transmitting on shortwave as a hobby only and reception reports are highly appreciated and will be replied by a QSL stencil. Send your reports to their new address Via Valstorta 9, 33080 Porcia, Italy or just phone 434/366366.

Spectrum Leisure Communications, BM Broadcasting, London WC1N 3XX, England, has tested a second transmitter on 6272 kHz on 27th September.

Apart from Jay Burkette, there will be also shows presented by Mark Thyme (Radio Duck & Radio 48) in future.

Teleradio Stereo is another Italian station transmitting on shortwave on 6012 kHz. According to the station, they are using a separate transmitter on that frequency which has a power of 18 kW. But our Italian correspondent believes that the power is infact only 1.8 kW and their frequency 6012 kHz is the 4th harmonic of 1503 kHz, on which Teleradio Stereo can be heard officially. Anyway, lsitener's feedback is welcome at Via Carlo Evangelisti 3, 00136 Roma, Italy.

W.L.R. reported on its transmission on 20th September that a certain "Shetland Islands BC" (SIBC) with operator Ian Anderson claims to hit the airwaves soon illegally, although he is still waiting for a license to start broadcasting legally (and officially) on around 96 MHz FM in stereo ! It is said to have been already investigated 100,000 £ for

on 6318 kHz to 2 hours. So listen to Marabu every 2nd Sunday between 1000 and 1200 UTC.

Radio Orion announced recently that they are testing on 3514 kHz after closing down on 6290 kHz. Any logs ???

On 18th October, Right Wing Radio (c/o Wuppertal) plans a test transmission with its new 15 W rig on 6225 kHz between 0800 and 0900 UTC.

Yet another new station by the name of Sligo European Radio hit the airwaves with a live-transmission on 7415 kHz on 04th October. They announced the following address: S.E.R., 66 Saint Brigids Place, Sligo, Eire.

Superclan Radio has a new address which is as follows: Postbus 50, Arnhem in the Netherlands.

Weekend Music Radio plans to conduct test broadcasts to North America on either 6240 or 6290 kHz between 0500 and 0800 UTC or earlier (maybe as early as 0200). These tests shall take place on 01st and 15th November and on 13th and 27th December 1987. The mailing address for this hard to reply station is 42 Arran Close, Cambridge, England. (S.W.N.)

"Südtiroler Rundfunkstationen" is a brand-new German booklet containing detailed portraits of all 23 German-speaking stations, a list of all Italian-speaking stations in that area and some special reports about the radio scene of South Tyrol. This 40 pages booklet costs just 3,- DM or 3 IRCs and can be obtained from LS-Publikationen, Reiner Palma, Postfach 433, 2980 Norden, West-Germany.

"Radio Is My Bomb" is a book published by a Bristol-based anarchist group and gives specific instructions on how to set up pirate stations. The book is available for £ 2.40 (incl p & p) from Hooligan Press, BM Hurricane, London WC1N 3XX, England.

So far for the news today. Here is still an advertisement from one of our readers:

+++ For sale: 25 watts shortwave transmitter. Ready to operate on 48 or 60 metres. Transmitter will be send out with antenna and coaxial cable. Price: DM 300,- plus postage & packing. If interested +++ write to Adv 109, c/o RT. We will forward your letter !

When writing this issue of RADIOTELEX, a further letter reached our desk. So, here is still one news item we should add to the news before:

The Association Of Tropical Band Free Radio Operators (ATBFRO) is a new project launched by the Satellite Broadcasting Company (c/o Wuppertal). They ask all FR operators, if they can inform ATBFRO when they are plan to transmit in the tropical bands (like 60 mb.). All those plans, logs and predictions of the reception conditions on those bands shall be published in a single sheet called "ATBFRO-Info". A single issue and further infos can be obtained for DM 0.60.

It is doubtful that this project will show much success, as there were only a few stations which used the tropical bands in the past and which have crystals to transmit on those frequencies.

Anyway, try to listen also to the 60 mb. during your Sunday morning hunt for pirate stations, because sometimes there are one or two stations which can be also received on those frequencies (like PFBS, R. Huitzilopochtli or R. Moneyburner) !

And now we are really at the end of this RADIOTELEX-issue. Due to the amount of logs and news we received in the last two weeks, the illustration of the 4IFR-QSL card (from New Zealand) has to be postponed to one of the next issues (sorry 4IFR !). Many thanks to all contributors. Deadline for RT 110 is on 29th October 1987 ! Until then, TSCHÜSS, RT

radiotelex

Issue 109 / Vol. 5

15th October 1987

c/o P.O. Box 10 37 71, D-2600 Bremen I, West Germany.

It's Telex-time again,

Today, we start this issue of RADIOTELEX by taking a look to the current Offshore scene regarding the rumours in connection with SW-transmissions of Radio Caroline and the approaching return of Laser 576:

Radio Caroline is said to be testing on shortwave at the moment on 9950 or 9940 kHz. The latter frequency could be already observed by Anoraks UK in Blackpool. Nevertheless, it is believed that the possible frequency for regular transmissions will be 6205 kHz, the old RNI frequency. That would of course correspond with our news item in RT 108 regarding 24 hour transmissions from the North Sea of the religious World Mission Radio.

On 4th October 1987, Radio Caroline could be heard for more than one hour transmitting nonstop music, Caroline Overdrive jingles and announcing the following words in English and German on the air: (6220kHz)

"You're listening to a test transmission on shortwave from the North Sea". However, it is not sure, if this transmission was really made from the Ross Revenge or if it was something like a hoax from another station. In this connection, we should also add that Superclan Radio, which could be heard on the same day on 6205 kHz, has announced some minutes before that Radio Caroline is testing on SW and they also mentioned 6220 kHz in connection with that announcement.

The old Laser-ship MV Communicator is now 23 miles East of Walton and about 20 miles North of the Ross Revenge. It is likely that the station will return to the airwaves in the next weeks and two services will be run then. One service can be heard on 576 kHz under the name of Starforce 576. That programme shall consist of pop-music. The other service will be an Easy Listening music programme using the name Harmony Radio on 981 kHz. By the way, both services will be operated by an American religious organisation.

So much for the Offshore scene. We hope that the desire of some readers who wanted us to report more news from the Offshore scene was now fulfilled. O.k., then let's go on with the...

L A T E S T N E W S

Radio Buttercup informs us that they are using the old 30 W rig of W.L.R. on 6273 kHz. The transmitting site is somewhere in Ireland and the station is running by Jim Agnew who is also one of the operators of Radio Rainbow Int'l. Contact address for Buttercup is 151 Monaymore, Drogheda, Co. Louth, Ireland.

Radio Clash is a new station which could be heard for the first time via Radio Rainbow Int'l on 96.5 FM, 1521 kHz and 6240 kHz on 4th October 1987. Although the station were kindly enough to send us a sample of their QSL, no further details are known about Radio Clash. Anyway, the station's slogan is "Rocking both sides of the Atlantic" and the address is c/o Anoraks UK, Box RC, P.O.Box 539, Blackpool FY1 4RE, England.

Radio DX34 plans a test broadcast in the 48 mb. within the next weeks. Listener's mail should be send to Panoramast., 7016 Gerlingen, FRG.

The next show of the FRS-Holland (Postbus 41, 7700 AA Dedemsvaart, NL) can be heard via Superclan Radio on 6205 kHz between 0900 and 1300 UTC on 18th October 1987. FRSH will probably transmit regularly via Superclan Radio in future.

The repetition broadcast of the German Free Radio Corporation on 5th September 1987 was transmitted by Westside Radio and not via SWR's own transmitter.

In addition to the news item about Radio Marabu Int'l (POB 220342, 5600 Wuppertal 22, FRG) in RT 108, we were told that they have elongated their regular transmissions via the Scottish FR Network (W.L.R./Stella)

"Privater Rundfunk in Deutschland" (private radio stations of Germany) is a 10 x A4 pages German-written booklet containing frequencies, addresses and additional information of the private radio stations in Germany. We can highly recommend that booklet to all persons who are interested in a complete survey of those stations. It costs 2 IRCs and can be obtained from Andres Bittner, Haidbrook 21, 2000 Wedel/Holstein, West-Germany.

Stid-West Radio plans to send coloured photo-QSLs to its listeners. The programme of the German Free Radio Corporation, which could be heard on 25th October on 6280 kHz via SWR's transmitter, was a repetition of the one produced on the occasion of the DX-camp in Merschweiler in August this year. The address for both stations is P.O.Box 1471, 6690 St. Wendel, West-Germany.

And that's already the end of our newsdesk. Not much to report this week. So it is likely that there will be much more news in the next issue of RADIOTELEX. And as we still have some space, it's time for another edition of the RT-QSL survey.

Issue 110 / Vol. 5

29th October 1987

c/o P.O. Box 10 37 71. D-2600 Bremen I. West Germany.

Hi Telex-fans,

First of all, we have some news regarding the postponement of the RT deadline to Sunday. We have really found some readers who are kindly enough to phone us on Sundays. So we have now decided to start editing **RADIOTELEX** on Sundays from the next issue onwards. But this is only a test phase ! We hope that this test phase will be successful. In case that it won't be a success, we will return to the Thursday deadline.

Of course, we are still interested in written logs. So, if you have contributed to RT in the past, you are invited to send us your logs regularly in future, too. The same shall also apply to those of you who haven't contribute until today.

YOUR contribution is always welcome !!! It makes no difference whether you send us your logs and news by mail or by phoning us !

Well, we have also some news about the SAE-service:

Dutch 75 ct stamps are available again ! Unfortunately, there is now a lack of British 18p stamps. We only have a few yet and are now looking for some new ones. Anyone who can help us in that matter ?

Last but not least, we can now offer two C-60 tape-recordings called "FR Spots Part I" and "FR Spots Part II". "FR Spots Part I" contains 12 German-, 2 US-, 2 Dutch-, 2 Irish-, 1 NZL- and 1 British-FR-stations. On "Free Radio Spots Part II", you can hear 5 Dutch-, 3 British-, 3 German-, 2 Offshore-, 1 Irish-, 1 French-, 1 Swiss-, 1 US- and 1 Australian-FR-station. (further details about the station names etc. upon request).

All recordings on those tapes are in studio or FM-quality and each cassette is 60 minutes long. The price for each recording (incl. p & p) is DM 8,-, £ 3, skr 30, hfl 10, FMK 20 or FFr 30 (recorded on chromiodid band 1).

By the way, please pay attention to the enclosed promo-sheet of "LS-Publikationen" !

At the end of today's logbook, we should also mention that we had a contributor from the USSR for the very first time !
By the way, many thanks to all contributors of the RT-logbook !

L A T E S T N E W S

Atlanta Radio (P.O.Box 5, Hustanton, Norfolk PE36 5AU, UK) plans to broadcast its next show at the end of 1987.

(Only for adults! Not for children!)

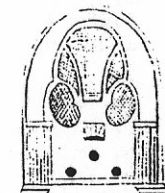

Radio Andrea International, which broadcasts regularly via Westside Radio International, announces the following address on the air: 88 Abbey Park, Baldoyle, Dublin 13, Eire.

In addition to RT 109, here is the complete address of Radio DX34, which could be recently heard via a relay somewhere in Europe (guess who ?): Panoramastraße 24, 7016 Gerlingen, West-Germany.

European Music Radio has recently tested on 6725 kHz with a power of 11000 milliwatts. They gave out an address of BCM, P.O.Box 65, London WC1, England on the air. Furthermore, the station is still looking for DJs who are interested in producing regular programmes in a foreign language (not English).

+++ LAST MINUTE INFO +++ LAST MINUTE INFO +++ LAST MINUTE INFO +++

When writing this RT-Logbook, another hot news item reached our office: Superclan Radio (Postbus 50, Arnhem, Netherlands) was raided last weekend (07th/08th Nov.) ! Nevertheless, the station is still on the air using its replacement transmitter now.

Last but not least, we should also give you the mailing address of Radio Cavendish which has tested on 6235 kHz today: 128 Kingfisher Drive, Eastbourne, Sussex, United Kingdom of Great Britain.

+++ LAST MINUTE INFO +++ LAST MINUTE INFO +++ LAST MINUTE INFO +++

And that's really the end of another bumper issue of RADIOTELEX. Many, many thanks again to 6 contributors from Germany and to Anoraks UK who phoned us today. We hope all of you will continue your support whether by letter or by telephone ! Deadline for RT 112 is on
+++++Sunday, 29th November 1987+++++
Bye bye, *TRV*

Issue 111 / Vol. 5

15th November 1987

c/o P.O. Box 10 37 71. D-2600 Bremen I. West Germany.

Hello to all of you on this wonderful Sunday evening,

You now hold No. 111 in your hands and that's of course a number we call "Schnapszahl" (3 identical numerals) in German. Cheers ! This "Schnapszahl-issue" of RADIOTELEX brings an innovation to you:

It's the first time that RT is officially published on Sunday and everything seems to work well.

A big thank you to all contributors of this issue, especially to those who rang in today !

Due to various reasons we are forced to change the layout of this issue, that means the news section will appear before the RT logbook. And last but not least, we must inform you that our SAE service has British 18p stamps in stock again !

L A T E S T N E W S

Astra Media Services (A.M.S.) is a new Irish FM station broadcasting from the Kilkenny area. They had given Riverside Radio permission for the relay and so you could hear A.M.S. on 01st November 1987 for the first time on SW 6210 kHz. The station promises to reply to all who send in reception reports. Send your reports to A.M.S., The Arcade, High Street, Kilkenny, Eire. (A-UK)

Border Radio's operator, Harry Marshall, wrote us that Border Radio has broadcast its MOR music programme daily on FM stereo over a period of 14 years in the Twickenham area. The station was very popular and had some 23,000 listeners though only about 200 or 300 rang in regularly at Border Radio asking for consultation, help etc. and of course music requests. Since the Home Office raided the Twickenham address some months ago, Border Radio is off the air. At the end of August 1987, the station has started with regular transmissions on shortwave in order to "give an alternative to the laughing machines and Top 50 of Spectrum and others. Most letters received comment favourably on the 'music with a different'". Border broadcasts with the co-operation of Spectrum Leisure Communications but is otherwise unconnected. The station does not use the Spectrum transmitter but has its own equipment and site now. Border's transmitter is a home-made job which delivers 50 watts into a halfwave dipole which is approx. 15 feet above ground level. The studio is equipped with "semi"-professional equipment (£ 14,000 of worth!) in preparation for stereo transmissions once more on 104.3 FM in the London area. At present, Harry Marshall's own record collection consists of about 35,000 different titles. On shortwave 6300 kHz, transmissions usually begin at 0900 UTC until 1200 UTC on Sundays only. The address of Border Radio is B.M. Broadcasting, London WC1N 3XX, England.

For the biggest selection of free radio merchandise, incl. "Weekly Report" and medium wave frame aerials...contact "ANORAKS U.K.", P.O. BOX 539, BLACKPOOL, FY1 4RE, ENGLAND.

BLACKPOOL FY1 4RE
England

Referring to RT 109, we can now tell you that the transmission of Radio Caroline on 6220 kHz on 04th October was indeed made from the Ross Revenge. That broadcast was an antenna test and the power used was only 15 watts. In the meantime, Radio Caroline could be also observed on Wednesday, 28th October transmitting on 6220 kHz and on the following day, Thursday, 29th October using 5955 kHz. As usual, it is not known at present whether those transmissions emanated from the Ross Revenge or another location. According to the latest PIN-Magazine, the religious station Voice of the Free Gospel will use the Caroline transmitter on SW for its daily transmissions in the not too distant future. A frequency in the 48 mb. will be used during day-time changing then to the 31 mb. in the evening.

The rumours goes on, what's coming next ????

Cruisin' Solid Gold Radio is the name of another new station being relayed by the Scottish Free Radio Network (SFRN) resp. Stella/WLR on 6318 kHz. Listeners' feedback is welcome at 100 Watson Crescent, Peterhead, Aberdeenshire AB4 6WS, Scotland.

The Dutch Relay Service (D.R.S.) or Gamma Radio International, as the station calls itself too, is back on the air since 11th October 1987. In July this year, the station had to stop its transmissions due to pressure from the postal authorities. As their usual frequency of 7383 kHz suffered from heavy interference, D.R.S. has now decided to test on several bands during the winter period. So, the following frequencies will be tested: 7433 kHz, 9395 kHz, 14850 kHz and 17422 kHz.

The first tests will take place on 9395 kHz very soon and they will be made in A.M. and S.S.B. mode starting at 0900 UTC. The programmes will contain:

A.M.: Music and station ID

S.S.B.: Telex and station ID

Furthermore, the next date and frequency will be also announced during these programmes. Send your reports to Postbus 81, 3450 AB Vleuten, Netherlands.

European Music Radio (BCM Box 65, London WC1, England) announced in its recent test transmission on 6725 kHz that the first official programme will be broadcast on 20th December 1987 followed by regular transmissions on every 3rd Sunday of the month.

On 01st November, Radio Gemini could be received with its yearly November broadcast giving out a new address which is as follows: 32 Puller Road, Boxmore, Hemel Hempstead, Herts, UK.

From December onwards, the well-known Dutch FM pirate station Keizerstad Radio from Nijmegen plans to broadcast on 6205 kHz (in parallel to FM) 24 hours a day with a power of 150 watts. (PIN)

PUBLICATIONS: D.P.M. Newsletter celebrates its 1st anniversary at present. No. 15 is just out now and contains 8 x A5 pages full of Free Radio, private and Offshore station news, press cuttings etc. A sample copy costs 1 IRC or 0.80 DM and can be obtained together with subscription details from Funkgemeinschaft, P.O.Box 1130, 4154 Tönisvorst 1, West-Germany. Another new arrival at our headquarters is PIN-Magazine No. 28. That issue contains news and background articles from the world of Free Radio, Offshore and the European private radio scene on 40 x A5 pages. We should also mention the frequency survey (compiled with the help of our RT Logbooks) and address list for SW-FR stations

Funky Sounds For Central Europe
Post Office Box 22 03 42
D - 5600 Wuppertal 22
Fight For Funky Radio I

in the period of July/August 1987. Send DM 3,- or 3 IRCs to PIN-Magazine, P.O.Box 220342, 5600 Wuppertal 22, West-Germany and you will receive your copy of that magazine. By the way, both magazines are entirely written in the German language !

The Satellite Broadcasting Company will be on the air via the Scottish Free Radio Network on 7424 kHz on 22th November 1987. That programme will also include a 30 minutes show presented by Roger Davis. Reception reports are highly appreciated at c/o Wuppertal-address (see above).

Radio Scorpio (Postbus 19074, 3501 DB Utrecht, Netherlands) informs us that their regular broadcasts via Radio Ireland International have to be suspended due to the low signal strength of RII's transmitter (especially on the continent). The last show of Scorpio via RII was on 20th September 1987.

Radio 49, Flat 'A', 129B Milton Road, Gravesend, Kent DA12 2CR, England, has changed its frequency to 6815 kHz, because 6204 kHz, which they used before, caused interference from Superclan Radio. Nevertheless, it is likely that Radio 49 will also use 6204 kHz from time to time, if Superclan Radio is off the air. Transmitting time of Radio 49 is 10.15-13.00 UTC.

Radio Brigitte announced in its recent programme that they now use a new 50 watts transmitter. However, the modulation is as bad as ever. But Brigitte has an excellent listeners' service. So don't hesitate to write a reception report to Brigitte van Gelder, Postbus 10, 7954 ZG Rouveen, The Netherlands.

Radio Digital could be received on 15th November 1987 on 6205 kHz announcing that they are transmitting with 600 watts. The antenna used is a half-wave dipole 2 metres above ground level. Of course, they are only playing music from Compact Disc. It was also told that the station usually broadcasts nonstop music on 9485 kHz. Is there anyone who has received Radio Digital on that frequency in the past ???

Anyway, no address is known for that station !

Radio Luce is a new French station which was relayed by Radio Waves International on 6275 kHz in the past 2 weeks. The DJ of that station announced that they are playing only French chansons in their programmes. Radio Luce gives out an address of c/o B.P. 130, 92504 Rueil-Cedex, France.

After being one day off the air (14th November), Radio Monique moved to 819 kHz on 15th November 1987. (AUK)

Radio Orion announced in their programmes that they have new QSL cards in 4 different colours available. Apparently, the station also seems to test some out of band frequencies at present (see logs). Contact address for Orion is 82B Edgewood Road, Rednall, Birmingham B45 8SG, Great Britain.

Süd-West Radio can now be reached at a brand-new address which is as follows: P.O.Box 1203, 6601 Heusweiler, West-Germany.

+++For sale: 30 watts shortwave transmitter together with an antenna of 60 metres length, 10 metres connecting cable, 5 crystals (5300, 5310, 6232, 6282, 6298 kHz) and a cassette-recorder. Altogether for just DM 400,- ! Write to R.T., Adv 111, c/o POB 103771 etc... and we will forward your letter !

radiotelex

Issue 112 / Vol. 5

29th November 1987

c/o P.O. Box 10 37 71, D-2600 Bremen 1, West Germany.

Welcome to another bumper issue of RT,

It's incredible, but we got so many news that we have to extend this
RADIOTELEX issue once again. You see, we spare no expense and pains
to keep you up to date with the world of Free Radio on SW.
Conditions today were quite poor resulting in a short log list (com-
pared with the ones before). However, it's Christmas season and so
there will be much more pirate activity within the next weeks.
By the way, we've missed some contribution regarding written logs.
Though some logs are phoned in every two weeks, we are still interested
in logs sent by letter ! So don't hesitate to write us !
Please also pay attention to the enclosed questionnaire of PFBS-Radio.

That's already the end of our logbook. Many thanks to all contributors of those log lists, especially to those of you who phoned in today (4 from Germany and Anoraks UK).

L A T E S T N E W S

Radio Andria International's DJ Dave Evans, formerly involved with Radio Valleri, will set up his own 150 W-transmitter as soon as possible and start on 6250, 7205 or 7350 kHz (so he never checked the bands - no clear channel there !) in March/April 1988. Radio Andria was set up on 11th August 1987 and is currently on the air via

Furthermore (we are still at the news item regarding Radio Waves Int'l), the 18 watts rig used at present will soon be replaced by a 50 watts transmitter, which shall also have a better modulation than the old one. Write your reports to B.P. 130, 92504 Rueil Cedex, France and don't forget to ask for your copy of Free Radio Log '87.

Prince Terry, operator of Westside Radio International, announced in his recent broadcast that he plans to test in the 41 metre band in a few weeks. Listeners' mail is welcome at 310 Collins Avenue West, Whitehall, Dublin 9, Eire.

Following the raid of the local FM station A.B.C. Radio (105.3 MHz), the British post office has closed down the Box 629, Eastbourne, Sussex address a few weeks ago.

Radio 48, which also used that address before, has now returned back to the old address of 32 Victoria Road, Salisbury, Wiltshire, SP1 3NG, England. Apart from that address, they can be also reached at the Utrecht address.

The 1st East European Free Radio Christmas Contest 1987 will be held from 24th December 1987, 22.00 UTC until 27th December 1987, 22.00 UTC. 200 East European DXers were invited to take part in that contest. Unfortunately, no West European DXers can participate at that contest, because their receiving equipment is far better than the one of the East European people and so there wouldn't be any chance for those persons to win a prize.

However, the organizers of that contest need your help ! In order to control whether the logs they received from the contributors are correct or not they need YOUR logs ! So, every West European DXer who wants to support that contest is invited to send his logs (please include also some programme details) of the Christmas days to Jens Adolph, Finkensteig 15, 7026 Leipzig, GDR.

For the biggest selection of free radio merchandise, incl. "Weekly Report" and medium wave frame aerials...contact "ANORAKS U.K.", P.O. BOX 539, BLACKPOOL, FY1 4RE, ENGLAND.

After all those interesting news, we are now coming to the longest advertisement ever published in RADIOTELEX (free of charge !). According to our minds, such a mammoth advertisement is a little bit too long for a magazine which usually consists of 4-6 pages. So, we have now decided to introduce the following charges regarding advertisements:

Four or five lines are free of charge for RT subscribers ! If you want to use more than five lines for your advert, we will publish it on an extra sheet and that would cost you 8,- DM or 3 £. We hope you will agree with that decision. If not, please drop us a line ! Here is the promised advert now:

+++ For sale: High quality Offshore Radio recordings for just £ 1.60 per hour. Please add extra for postage & packing. Payment by International Money Order, British Postal Order or Cash.

These 18 cassettes are available - no copies:

- 1) -07/12/1986 Laser, D.L. Stone from 10.07 C-60
- 2) -David Lee Stone continued from above C-60
- 3) -07/12/1986 Laser Hot Hits "K.C." C-60
- 4) -20/04/1987 Laser, Brandy Lee, Paul Jackson C-60

Westside Radio (6280 kHz) on every 2nd Sunday from 11.00-12.00 UTC. From 1988 onwards, the station will be relayed by Westside Radio every second week. Contact address of Andria is 88 Abbey Park, Baldoyle, Dublin 13, Ireland.

Some new rumours regarding shortwave transmissions of Radio Caroline also reached our office. According to Anoraks UK, Radio Caroline will likely start transmitting on 6210 kHz within the next days. At first the 558 service is to be relayed, but religious programmes are expected to be introduced soon.

However, due to heavy storms the transmitting mast of the Ross Revenge was cut off and is fallen into the North Sea some days ago. So, Radio Caroline and Monique cannot be heard on MW at the moment. It is now likely that the mast will be re-erected at first before doing the remaining work on the SW aerial. Obviously, the introducing of the SW service will be postponed again.

Radio CLCG (P.O.Box 54 01 01, 4100 Duisburg 11, FRG), recently received via Radio Telstar again, informs us that they have received more than 25 reception reports including one from Algeria and the USSR (hopefully one of our USSR subscribers) for their September transmission via Telstar. Radio CLCG is still looking for DJs who are interested in producing shows for the station. Furthermore they are also looking for stations who can relay their programmes on SW and/or MW. By the way, the CLCG show relayed by Radio Orion today, should be originally broadcast in October this year.

Cruisin' Solid Gold Radio (100 Watson Crescent, Peterhead, Aberdeenshire AB4 6WS, Scotland) gives us the information that the next transmission will take place on 06th December 1987 on 6318 kHz, 10.00-12.00 UTC. So tune in, quite good show !

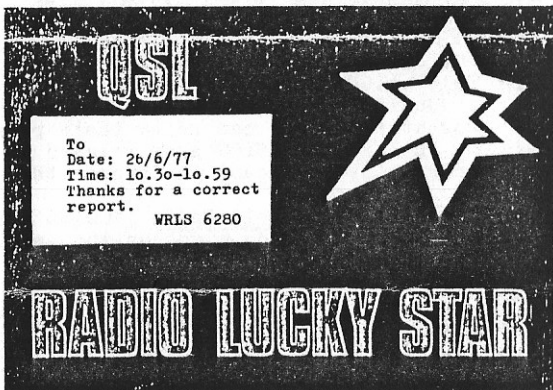

Radio Diamond made a surprising return to shortwave on 29th November 1987. It was announced that they want to hit the airwaves regularly again by using a brand-new equipment. The address of Diamond is still P.O.Box 22 03 42, 5600 Wuppertal 22, West-Germany.

On 08th November 1987, a station called Voice of Freedom could be received on 6275 kHz in the UK. The station formerly operated on 1584 kHz and has now changed its name for the shortwave service to Radio Electra. Radio Electra was on the air for the first time on 22nd November using 6275 kHz again. However, no address is known for the station at present. The only fact we know is that the station is based in Liverpool.

Brian Richards, operator of Radio Star International, told us that Free Medway Town Radio will be making a comeback ! It has changed its location and ownership and will be probably relayed from somewhere in Ireland. By the way, Richards was involved with FMTR formerly.

The Free Radio Service Holland informs us that "the station was unable to have its regular 3rd Sunday broadcast in November due to reasons beyond their control. On 20th December 1987, FRSH will be on the air with special Christmas programmes. For the eighth time, the annual FRSH Christmas Party will be aired on SW. FRSH likes to invite everyone to participate. Send your Christmas dedications/greetings written or on tape to FRSH-Holland, Postbus 41, 7700 AA Dedemsvaart, Netherlands. New Year's greetings to radio friends and relatives are welcome, too. They will also play your record requests. December 20th, 1987: Enjoy the Christmas spirit and the best radio you will give... !"

Radio Waves International is celebrating its 4th anniversary at present. The first transmission took place on 13th November 1983 on 6250 kHz. On occasion of that birthday, they have published a special booklet called "Free Radio Log '87" containing on 18 x A5 pages the history of R.W.I. and a frequency list of Free Radio stations on SW & MW (not the latest one but still quite useful). Radio Waves Int'l also plans to edit a special Christmas QSL card this year.

Radio Madison told us that they plan a special programme during Christmas period on 7290 kHz. Radio Madison can be now contacted at a brand-new address: P.O.Box 220342, 5600 Wuppertal 22, FRG.

Radio Pacman has a new address, too, which is as follows: Postbus 103, 8120 AC Blist, Netherlands. (DPM)

Right Wing Radio, c/o Wuppertal, will make a 3-hour Christmas show with 4 DJs on 25th December 1987. The transmissions starts at 09.00 UTC and will take place on 6225 kHz.

" On the air on the Scandinavian sky - R W R never die ! "

The next transmission of the Satellite BC Company (c/o Wuppertal) will be on 27th December 1987 on 7423 kHz (via SFRN, where else !). Furthermore, SBC can be also heard with a special Christmas show on 25th December and also on 26th December 1987 on either, 6318 or 7423 kHz. All reception reports for those transmissions will be verified by a special Christmas QSL card.

Referring to RT 112, Radio Scorpio (Postbus 19074, 3501 DB Utrecht, NL) informs us that an error had found its way to the info they've sent us some time ago. The Christmas show will be transmitted from 09.00-1300 UTC (via SFRN) on 20th December 1987 and NOT on 19th December !

Radio Star Int'l (P.O.Box SH9, Sheerness ME12 1AQ, UK) wrote us that they will hit the airwaves today (13th December) at 09.00 UTC on a frequency between 7400 and 7500 kHz. After that, at 10.00 UTC, a programme of Free Medway Town Radio should be broadcast. However, both stations could not been received in that frequency range today !

Anyway, according to their letter they will use that frequency range on every 2nd Sunday from 1988 onwards.

Radio Stella Int'l announced that the station is about to start a regular German service hosted by Jeff Anderson (the one of Radio Pogo 104 again) in January next year. In fact, the first show which will last 90 minutes should be on the air on 10th January 1988.

A late arrival but still of some interest is the information that a German-based station (the station wanted us not to mention their name) was nearly raided by the German PTO on 18th October 1987 when transmitting on shortwave. The station just tested its new transmitter and as usual the area around the transmitter was secured by their cordons. However, due to technical problems the transmitter had to be switched off after 15 minutes. Luckily for the station ! About one minute after the closedown one of the cordons informed the staff at the transmitter that he has sightened a yellow radio bearing car of the German PTO which we call "Funkstörungsmeßdienst" in German. The staff of the station took less than 5 minutes to remove the car with the transmitter and to pull down the aerial. And so the German "Funkstörungsmeßdienst" failed !

According to the station, everything points to the fact that someone has kept an eye on the station or that they were betrayed ! Anyway, the station will continue its transmissions but they will only transmit from a neighbouring country of Germany in future.

+++ For sale: "The Guardian" newspaper 29/07/1967 includes item on closure of Radio 390. Cost £ 12 but will sell for £ 7.
"NME" 7/10/1967; All the pop news from that period. Price £ 1.
Free - If you purchase both of the above "Caroline 259" and Radio Essex (LBP) stickers. Write to RT, Adv 113, c/o POB 103771,....

And that's the end of this bumper issue. Don't forget that RT 114 will be published in one week already: 20th December 1987 *****
Many thanks to all contributors, especially to those who rang in today (6 loggers from Germany and Anoraks UK from Blackpool) ! Bye bye !

radiotelex

Issue 113 / Vol. 5

13th December 1987

c/o P.O. Box 10 37 71, D-2600 Bremen I, West Germany.

Hello Free Radio fans,

Before starting with the logs, we must inform you that the RT - deadlines of the next issues will vary from the normal dates due to Christmas and New Year. Please pay A T T E N T I O N to the next 3 deadlines which are as follows:

RT 114: 20th December 1987 (in one week already, but that will be a shortened issue (2 pages))

RT 115: 06th January 1988 (Wednesday ! An extended issue containing all Christmas and New Year's logs (6 pages or more))

RT 116: 17th January 1988 (Sunday as usual ! A normal issue (4 pages))

So far for the next deadlines of RADIOTELEX. From RT 116 onwards, we will continue our fortnightly Sunday deadline of course !

Well, this issue is just another bumper issue containing also a feature about SW Free Radio in the USA ! We hope you will enjoy that special feature. Many thanks to Jim of Radio "J.W." for assisting us in compiling the frequency list of those stations.

But first of all, we will now start with the...

L A T E S T N E W S

Beatle Radio was on the air today using the transmitter of SFRN on 6318 kHz. The station can be contacted at P.O.Box 2778, Elverhoy, 9001 Tromso, Norway.

Britain Radio Int'l (c/o Utrecht & Salisbury) intends to be on the air twice over the Christmas period according to the following schedule:
Boxing Day, December 26th: 10.00 Roger Davis / 11.00 Adrian Cooke / 11.30 BRI's X-mas Party / 12.45 Jayne / 13.30 Closedown
Sunday, December 27th: 09.45 German service / 10.15 Roger Davis / 11.30 Adrian Cooke Free Radio News / 12.00 Guest DJ show of Freddie Archer of Caroline SW / 12.45 Jayne / 13.30 Closedown
 Both transmissions are likely to go out on BRI's new frequency of 6306.

Radio East Coast Commercial reports that a UK-based station called Delta Radio is ready to commence operation with Saturday broadcasts on 6230 kHz before Christmas this year. Delta will be using the POB 5, Hunstanton, Norfolk address and is apparently run by one of the former RECC DJs as far as we know.

Radio East Coast Commercial (c/o Hunstanton) itself will be on the air from 1000 UTC on Christmas Day and will be having a live telephone line for those who wish to ring in during the hours of this special programme (only!). The telephone number will be (04853) 2742. Do not ring this number any other time!
 By the way, many thanks to Neal West for sending us his X-mas greetings!

The Indian Ocean Broadcastin Service (IOBS) could be received with its 1st European transmission in the past two weeks broadcasting via Radio Tutenchamun on 6268 kHz. The programme was presented by Mr. Asia and also included a quiz contest in which you can win an Asian pop album, if you answer the following question:
 Name 4 islands in the Indian Ocean and the countries to which they belong. Send your reports and quiz entries to IOBS, c/o RT, POBox 103771, 2800 Bremen 1, FRG.

From 1988 onwards, Radio Joystick (c/o Wuppertal) will be broadcast on every 4th Sunday of a month from 09.00 - 11.00 UTC on 7423 kHz (via SFRN). Apart from that, Radio Joystick will be also relayed by Radio Tutenchamun in the 48 m.b. at the end of this year.
 Radio Joystick has also a new DJ, Jeff Anderson of Radio Pogo 104, and this fact will result in a change of the music format played in the RJOY-shows.

Radio "J.W." (Juliett Whisky) is a new British station being on the air on shortwave. Radio "J.W." has been in existence in one form or another since August 1966 using different names and frequencies on MW and FM. The station name comes from a conjunction of Radio Juniper and Radio Wally.
 Anyway, from 01st January 1988 onwards, the station can be received on every other Sunday, 09.00-11.00 UTC, on either, 6320 kHz or 7410 kHz. On Friday nights, the station is also on the air on 1665 kHz using the name Angel Radio.
 Radio "J.W." uses two transmitters of 200 watts fed into a half wave dipole for those transmissions. Furthermore, they also possess a standby transmitter with a power of 80 watts. Listeners' mail is highly appreciated at "G.Y. 24 - JIM", P.O.Box 60, Grimsby DN34 4JW, United Kingdom of Great Britain.

The number in brackets behind each station gives you the address code used in the address list above !

A Basic Look Into US Pirate Radio**Frequencies & Times**

To start our Look Into US Pirate Radio, some info on when and where to listen if you want to hear one of those illegal emissions:

On short wave, the frequency range between 7375 and 7450 kHz is no doubt the most popular pirate band in the US where you can expect free radio activity at any time throughout the weekend. Most of the stations, however, appear in the late afternoon/evening hours on 41 metres on Saturday Eastern Standard Time EST which, converted into UTC, means Sunday midnight till 0600hrs.

Apart from 7 MHz there are several other places on the dial where you may find pirates, for instance between 15030 and 15060 kHz below the 19 mtr broadcasting band.

6.9MHz is certainly worth checking, too, and so is the range below the official 25-metre-band around 11.6 MHz.

The 48 mb, the place where most European pirate stations pop up, is less well-known overseas but nevertheless there are a few stations to be heard there as well.

There is not much activity on medium wave and FM in the USA except for New York City where some stations are on the air; the medium wave pirates mostly use the 180-metre-band around 1620 kHz during the late evening hours and can be picked up along the East Coast. However, it must be pointed out that most radio piracy in the US takes place on short wave.

Corresponding with the stations

The vast majority of pirates have got an address open for listeners' mail to come in. As in Europe there are a few so-called maildrops that pass the letters on to the station in question, so that the operator's real name and address is kept secret.

A high percentage of stations reply to letters and reports from listeners by sending out a QSL and a personal note sometimes, too. Although the word "QSL" may sound rather bombastic you normally get just a photo-copied sheet or even a self-painted card. Very few stations surprisingly issue info-sheets which results in not much station news being made public.

Naturally, no station replies for free; if you write to a US pirate make sure you enclose either 3 new 22ct stamps or 3 IRCs to get something back later on.

The two best known maildrops in the USA are:
 PO Box 982, Battle Creek, Michigan 49016, USA and
 PO Box 5074, Hilo, Hawaii 96720, USA.

Programming/Production/Presentation

It is hard to name the general contents of pirate radio programming in the USA; perhaps "to put out anything that cannot be heard on the legal stations" would be the best description one could think of.

Of course, there are several stations which just transmit the Top-40 tracks audible on any legal FM station throughout the country. However, such stations are usually regarded as dull and do not get much support from their limited audience.

A rather high number of stations across the Atlantic are there because of political motives. Some stations even set up special telephone links so that listeners are able to phone in and discuss with the station's staff in the studio while the talk is broadcast at the same time (live).

Only few pirates are specialist music stations in its real sense; most of the stations including the political ones do play music but add some form of spoken word to their musical format. That "spoken word" can either be silly commercials, FCC sketches or anything else of humour or interest.

In this respect, the US stations sound rather unusual in their programming style and make up a completely different listening if you compare it to the European scene.

A couple more things to add: generally, the pirates do not sound very professional by means of both their announcements and technical production of programmes. The US stations are hardly well-equipped studio-wise and their transmitters (in most cases old army or ham rigs of 50 - 100 watts power) cannot put out a fantastic sound then.

Like in Europe all the stations are run purely as a hobby and it appears the operators spend less time on their free radio projects than others would do in Europe, so in general the stations' standard remains not very high - in spite of several exceptions. Most stations tend to broadcast for a while and disappear after about a year for various reasons (loss of interest, technical problems or an FCC bust); at present there are not more than a handful stations on the air with some sort of regular format longer than twelve months.

The Dreadful FCC

One of the reasons why so few US stations stay active longer than a year is the postal authorities called FCC which stands for Federal Communications Commission. Honestly, it must be admitted that the FCC does work quite effectively when it comes to tracking down pirate stations. The FCC operates various monitoring offices (so-called field monitors) all around the country who are certainly the most ambitious pirate DXers in America...

The present laws state that a station's operator who was raided (the common expression for that is a bust) can be sent to prison for a year plus a 2,000 US-dollar fine but normally only a fine of around 1,000 US-dollars is imposed and equipment is sometimes taken.

The Dreadful FCC (contd)

Despite the fact that most stations operate from fixed premises on each occasion it is hard to bust them as their airtime is limited to 30 or 45 minutes and transmissions are very sporadic. After all, the situation can be compared with the one at present in West Germany.

What may be typical for the US scene is that whenever a raid happens and is made public all stations stay silent for a while before resuming normal operation.

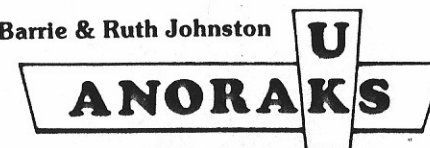

Final Word

All in all, listening to US pirates may be a completely new experience for European DXers as each station is more or less a rarity (logging SW pirates is a real challenge there); and whatever you may think about those stations, in some way or another they are unique.

L A T E S T N E W S

Radio Atlantis SW could be received today (20th December) with one of its rare transmissions giving out a new address of 128 Kingfisher Drive Eastbourne, Sussex, UK (or you can also write to the Wuppertal address). It was also announced that the new Radio Atlantis SW-video can be obtained for £ 5 from that address.

R. Caldonia Int'l (Postbus 65027, 3002 DA Rotterdam, NL) is said to be broadcast a special Christmas show on 25th December 1987 from 0900-1600 UTC. The frequency is probably 7370 kHz.

From 1988 onwards, European Music Radio plans to transmit on every 3rd Sunday on either, 6275 or 6340 kHz.

On 20th December, an old tape of Sun Radio could be heard for about 10 minutes being relayed by Radio Digital on 6205 kHz. Sun Radio was a local FM station broadcasting to Medway on 104.5 MHz 3 or 4 years ago. The station is no longer in existence and we advise you not to write to the announced address (Rosewarne Cottages...), because it is likely that you will never receive a reply. Afterwards, Radio Digital itself was on the air testing the equipment. It was announced that the next transmission will take place next week probably. The address for the station is still unknown!

According to a QSL card sent to us by Radio Huitzilopochtli, we are now able to give you some more details about that station with the n nobody can pronounce. Huitzilopochtli is named after the sun-god the Aztecs and means "humming-bird to the left". The station uses a 25 W rig fed into a half wave dipole. The OP, Mr. Nuke Man, informs us that he replies to listeners' mail just as the fancy takes him. In clear, it means that "everyone will get a reply, but usually not under a running period of a three-figure number". Anyway, the address for the station is c/o Wuppertal and if you enclose 3 IRCs you will also receive a single record apart from your QSL card.

KLA Radio also announced a new address in its programmes: BM Nectar, London WC1N 3XX, United Kingdom of Great Britain And Northern Ireland.

Starfleet Radio (c/o Utrecht) plans the next transmission on 26th Dec. 1987 on 6295 or 6305 kHz at 08.45 UTC.

That's it for today. Many thanks to all contributors! Deadline for RT 115 is on Wednesday, 06th January 1988 (or ring in on 03rd Jan.1988)!
